

Douglas and Jessica Rupp

VERIZON DATA REQUEST NO. 24B: Paragraph 3.3 of the Petition alleges that certain construction costs, either the full cost of construction or the \$11,040 fee for a construction estimate, is beyond means of the Petitioners. Would a proportionate share of the cost of construction and/or the construction estimate be beyond your means? If so, please describe your financial situation, including source(s) of income, principal financial obligations (for example, mortgage payments, car payments, other loans, etc.), any real property owned by you, any significant assets owned by you (such as retirement accounts), and any other information that is significant to evaluating your financial situation.

I would gladly pay the \$11,040 construction estimate if it would bring wireline telephone service to Skyko 2.
