**Processes and Procedures to Ensure Compliance with Service Quality Standards
and Consumer Protection Rules**

This document details the processes and procedures that St. John Telephone, Inc. (“St. John”) follows to ensure compliance with service quality standards and consumer protection rules as laid out in FCC Form 481 Instructions.

For service quality standards that are affected by plant issues, St. John engineers and installs its plant and other facilities in such a way as to ensure, to the greatest extent possible, compliance with service quality standards that exist at the time that the plant and facilities are constructed.

In addition, employees are periodically briefed on service quality standards and consumer protection issues. In particular, if any set of issues appear to be prevalent, employees are given briefings on how to handle such issues. A recent example is the call completion problems that have arisen and the customer calls that are generated as a result. Although this is not a service quality problem caused by St. John, it does affect customers of St. John and, therefore, deserves the attention of St. John employees.

St. John also periodically reviews its operating procedures to be sure that those operating procedures are in compliance with service quality standards and that the operating procedures are not in violation of consumer protection rules. If questions arise, legal counsel is sought as needed.

If complaints are filed with St. John related to service quality standards or consumer protection rules, the complaint is immediately investigated, the matter tracked and any corrective action noted. This process ensures that problems are addressed and corrections made. It should be noted that St. John has received no customer complaints in the past five years regarding service quality standards or consumer protection rules as they relate to the service offered by St. John other than call completion issues, which, as noted above, are not caused by St. John.

(600) Functionality in Emergency Situations

<600>	Certify compliance regarding ability to function in emergency situations	Yes
<610>	Descriptive document for Functionality in Emergency Situations	522442wa610.pdf

Line 610
Statement Demonstrating Functionality
In Emergency Situations

At line 600 of FCC Form 481, St. John Telephone, Inc. (“ St. John”) certified that it is able to function in emergency situations as set forth in 47 C.F.R § 54.202(a)(2). This means that St. John has reasonable amount of back-up power to ensure functionality without an external source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations. This statement will detail how St. John is prepared to ensure continued service in an emergency situation.

St. John has back-up batteries that provide service for the central office during a power outage with the capacity to function for at least twenty-four hours. In addition, there is a natural gas powered generator available which can operate as long as the natural gas supply is not interrupted that automatically starts during any power outage or spike in power which powers the central office and business office. Further, St. John has portable generators available for remote sites.

St. John has route redundancy for long distance service, E-911 trunking and SS7 signaling trunking.

St. John's outside plant is primarily fiber that is buried and, thus, protected from most weather events. Because of the fiber, St. John has the capacity to manage traffic spikes without extraordinary additional effort.

In the case of isolated groups of customers that may suffer damage due to a fiber cut, St. John maintains sufficient staff and other resources to be able to put customers back in service in a very short amount of time. St. John's emergency service equipment is located within its exchange and requires very little time to dispatch.

“Please check these boxes below to confirm that the attached document(s), on line 1210, or the website listed, on line 1220, contains the required information pursuant to § 54.422(a)(2) annual reporting for ETCs receiving low-income support, carriers must annually report:

- <1221> Information describing the terms and conditions of any voice telephony service plans offered to Lifeline subscribers,
- <1222> Details on the number of minutes provided as part of the plan,
- <1223> Additional charges for toll calls, and rates for each such plan.

NOTICE

Service Charges

St. John Telephone, Inc. has been serving the St. John area since 1913. We serve both residential and commercial customers in our rural community with quality services at competitive rates. In addition to our basic telephone services, we offer high speed internet access, special calling features and voice mail. Our basic services are comprised of several components, which at a minimum include:

Service Provided

Single party voice grade access to the public network

Residence \$18.00 Business \$18.00

Access to emergency 911 services State/County mandated surcharges

Residence \$0.25/\$0.70 Business \$0.25/\$0.70

St. John Telephone, Inc. participates in the Federal Lifeline and Link-Up Programs. Under these programs, St. John Telephone, Inc. offers to qualifying low-income customers a discount off the monthly rate for basic residential exchange services. The current discounted monthly rate for Lifeline residential service is up to \$9.25 per month.

These services are available to all customers of St. John Telephone, Inc. The costs associated with each are reflected each month on a regular telephone bill along with other charges for services provided by us. Information about these and other services are available by contacting the St. John Telephone, Inc. business office at (509) 648-3322.

Tangled mass of fishing line chokes lake bottom

BY BECKY DICKERSON

Walla Walla diving team, Lisa Anderson and William Lambert, say they have found a mass of fishing line just off the foot of Rock Lake. The mass begins east of the boat ramp and extends 20-40 feet out.

"I got caught up in the line and had to cut my way out," said Anderson.

The diver says the tangle of fishing line is "at least 50 yards wide and five yards deep." Anderson suspects the mass grows every time someone gets their cast stuck and cuts their line.

Resident Todd Dickerson, 51, who grew up fishing on the lake, thinks the mass has grown over the years from discarded line across the nine-mile lake.

"I bet fishing line floats down to the foot from all over the lake considering how the lake drains to this point," he said.

Anderson and dive partner Lambert say they would volunteer their time to help clean up the fishing line. Efforts to reach Washington Fish and Wildlife by press time were not successful.

PHOTO BELOW LISA ANDERSON

Divers discover this mass of fishing line, which has collected near the foot of Rock Lake. They estimate the web is at least 50 yards wide and five yards deep and say it creates an underwater hazard for habitat and recreationists.

PHOTO ABOVE TOM SCHIERMAN

Falling numbers continued

The grain samples are sent to a lab, but the results take days to get back. By then, an entirely new issue arises.

"We didn't know who had problems and who didn't have problems," said Sammie White, who manages grain coming in and going out for shipping and export at a grain cooperative in Genesee, Idaho. "So, they were all going into these big silos."

Now White has millions of bushels of grain all mixed up. And it will all fetch a lower price — some may end as cattle food.

White said in a small town, it's just uncomfortable.

"Emotionally there probably will be a couple of guys that will be put out of business because of it, he said. "And that's tough."

Bin-busting yields worldwide
In early November, Northwest wheat marketers fan out across Asia with glossy number catalogues and information to talk up this year's crop.

It could be a tough sell. More than 40 percent of the biggest class of wheat — soft white — tested so far has low falling number problems.

That's a lot of wheat. Washington, Oregon and Idaho harvested about 300 million bushels of all classes of wheat this year. That's one of the region's larger hauls. Some areas are calling it a bin-buster.

And this is a buyer's market. This year the wheat price is already pretty low because the world market is awash with wheat. Russia, Canada and Australia all have high yields. Plus, the U.S. dollar is strong, pinching exports.

Northwest wheat marketers are trying to offload some of the surplus on food aid programs. So far, they've sold 85,000 tons for use in Bangladesh. Northwest wheat experts say once the better grain has been sold — much of the low falling number wheat might end up as cattle food in feedlots.

That's not ideal, as Northwest grain is usually reserved for the highest-paying human customers across the globe.

Long-term effects for farmers?
As for farmers, they're worried this bad year will affect them for the next 10 years. Their federal crop insurance

will count this low falling number problem against them for a decade in their grower yield averages. Washington and U.S. legislators have been pressing the USDA to change this policy.

Scientists at Washington State University and with the USDA are trying to help figure out a better, more accurate testing for low falling number. And wheat breeders are trying to isolate new varieties of grain that have better resistance to low falling number — and still have high yields.

But it's slow going. New varieties of wheat can take more than 10 years to develop into a commercial seed.

Meanwhile, farmer Larry Brown has been plowing up his fields in the windblown Palouse hills near Oakesdale, Washington.

"I've had problems, we've all had problems with falling numbers in the past," he said. "But nothing this severe and this widespread."

By his count, he's \$85,000 short of breaking even this year.

So he said it's time to turn the wet earth over — and put this year behind his plow.

NOTICE

Non-Discrimination Statement

St. John Telephone, Inc. is the recipient of federal financial assistance from the U.S. Department of Agriculture (USDA). USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for past civil rights activity. In any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident. Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at www.nrc.usda.gov/ex1037/wada/page.do?disc=discrimination-complaint-form and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.insta@usda.gov. USDA is an equal opportunity provider, employer and lender.

4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission's public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year. Name of Attached Document Listing Required Information _____

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

4004a. Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481. Name of Attached Document Listing Required Information _____

4004b. Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area. Name of Attached Document Listing Required Information _____
