**In Emergency Situations**

At Line 600 of FCC Form 481, Pioneer Telephone Company (“Pioneer”) certified that it is able to function in emergency situations as set forth in 47 C.F.R § 54.202(a)(2). This means that Pioneer has reasonable amounts of back-up power to ensure functionality without an external source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations. This statement will detail how Pioneer is prepared to ensure continued service in an emergency situation.

Pioneer has two back-up generators available with a minimum of a four hour power supply that is run on natural gas. One is for its host central office located in the LaCrosse exchange and the other is for its remote central office located in the Endicott exchange. In addition, it has portable generators available for other remote sites.

Pioneer has route redundancy for long distance service, E-911 trunking and SS7 signaling trunking.

Pioneer's outside plant is designed, engineered and built with sufficient capacity to handle traffic spikes resulting from emergency situations and has been able to do so in the past. Pioneer is in an area where severe weather strikes periodically and has been able to handle communication needs at those times and has the experience from those situations to be able handle such emergency situations in the future.

In the case of isolated groups of customers that may suffer damage due to a cable cut, Pioneer maintains sufficient staff and other resources to be able to put customers back in service in a very short amount of time. Pioneer's emergency service equipment is located within its exchange area and requires very little time to dispatch.
