WN U-7  
FIRST REVISED SHEET NO. 180  
CANCELING ORIGINAL SHEET NO. 180

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS:

ACCOUNT CODE FORCED

This feature prevents the use of a telephone by unauthorized individuals. A code must be dialed which is recognized by the system, thereby allowing the use of the telephone. If an invalid code is dialed, then reorder/NU tone is returned to the subscriber.

ACCOUNT CODE VERIFIED

A Verified Account Code is an account code that can be dialed by a subscriber when certain features or enhanced facilities are required (but which are not normally available to the subscriber). The account code can be entered by a subscriber at any telephone. The entry of the verified account code changes the service category of the subscriber to the service category (and its associated features) assigned to the account code. The facility restriction of the subscriber is also changed, when the account code is entered, to the restriction assigned to the account code. These changes only apply for the duration of the call.

ANONYMOUS CALL REJECTION

Allows a customer to dial a code that will cause the feature to reject anonymous calls made to their stations. An anonymous call is one for which the calling number is unavailable, either because the caller has elected per call blocking, the line from which the call originates is subject to per line blocking, or for any other reason caller identification is unavailable.

AUTOMATIC CALL BACK

Allows a customer to dial a code (\*66) that will cause the feature to place a call to the last telephone number that the customer dialed.

FIRST REVISED SHEET NO. 181  
CANCELING ORIGINAL SHEET NO. 181

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

AUTOMATIC RECALL

Allows a customer to dial a code (\*69) that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not need to know the number of the calling party. If delivery of the original calling party's number was subject to blocking by the calling party or is otherwise not available, the feature will not return the call. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available.

The customer is responsible for payment of toll charges that may occur when using the Automatic Recall feature.

CALL FORWARDING – BUSY

Allows a customer to have incoming calls forwarded to another predetermined number when the called number is busy. Any message toll charges applicable to the forwarding are assessed to the customer with the Call Forwarding – Busy feature.

CALL FORWARDING – NO ANSWER

Allows a customer to have an incoming call forwarded to another predetermined number within the same central office switch if the customer does not answer after a preset number of rings.

FIRST REVISED SHEET NO. 182

CANCELING ORIGINAL SHEET NO. 182

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

CALL FORWARDING – REMOTE ACTIVATION

(M)\*

Allows a customer remotely to activate and deactivate the Call Forwarding function. Calls can be remotely forwarded to any telephone number. This feature is in addition to basic Call Forwarding features. Any message toll charges applicable to the forwarding are assessed to the customer with the Call Forwarding – Remote Activation feature.

CALL FORWARDING – VARIABLE

Provided for the transfer of incoming calls to another telephone number by dialing a code and the telephone number to which the calls are to be transferred. Any message toll chargers applicable to the forwarding are assessed tot the customer with the Call Forwarding feature.

CALL FORWARDING – VARIABLE TIMED

This feature allows a subscriber to have all calls forwarded to another (selected) directory number during a programmed time period. While Call Forwarding Variable Timed is active, the subscriber can originate calls in the normal manner. The subscriber with Call Forwarding Variable Timed active received a ring reminder each time a call is forwarded, but cannot answer the ring reminder. A call that has been forwarded can again be forwarded to another directory number. As many as five successive “forwardings” are allowed.

When Call Forwarding is activated on a subscriber line that has Call Waiting in effect, Call Forwarding will be followed.

(M)

CALL HOLD – RETRIEVE

This feature allows a subscriber to return the telephone’s handset on-hook while a call is in process. Calls placed on Hold are retrieved via a Call Hold – Retrieve feature access code. A caller on hold cannot form a Three Way Call and Three Way Calls cannot be placed on hold. A call on hold cannot be retrieved while another call is in progress. A subscriber who has been placed on hold cannot respond to Call Waiting.

Call Hold is inhibited following a call to an emergency operator because use of the switch hook flash or recall button is denied.

FIRST REVISED SHEET NO. 183  
CANCELING ORIGINAL SHEET NO. 183

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

CALL HOLD – RETRIEVE (Continued)

(T) (M)\*

Retrieve feature access code cannot be used to retrieve a party on consultation (soft) hold (Call Waiting). A subscriber who attempts to dial the retrieve feature access code while a call is on consultation hold will be given a reorder/NU tone.

If, in addition to a “hard hold” call, a subscriber has a call on a consultation hold, the call on consultation hold must be retrieved first, by flashing the switch hook or pressing the recall button.

CALL HOLD REMOVE RETRIEVE

Allows a subscriber to retrieve a hard held party from a location different to that of the subscriber who had originally placed the call on hold. Accordingly, a subscriber can place a call on hold at one telephone and retrieve the call from a second telephone.

CALLER IDENTIFICATION – NUMBER

Allows for the automatic delivery of a calling party’s telephone number (including non-published and non-listed telephone numbers) to the called station before the call is answered. Customer-provided equipment is necessary to display the delivered number. If per call blocking or line blocking has been activated by the calling party, or if the calling number is otherwise unavailable, the calling party’s telephone number will not be delivered to the called station.

(M)

CALLER IDENTIFICATION – NAME AND NUMBER

Allows for the automatic delivery of a calling party’s name and telephone number (including non-published and non-listed telephone numbers) to the called station before the call is answered. Customer-provided equipment is necessary to display the delivered number and name. If per call blocking or line blocking has been activated by the calling party, or if the calling number is otherwise unavailable, the calling party’s telephone number will not be delivered to the called station.

 FIRST REVISED SHEET NO. 184  
 CANCELING ORIGINAL SHEET NO. 184

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

CALLER IDENTIFICATION – NAME AND NUMBER (Continued)

(T) (M)\*

The name displayed will be the name associated with the calling telephone number as shown on the Company's records if the call originates from a telephone number to which dial tone is provided by the Company. The Company in its discretion may abbreviate or limit the name for display purposes. The Company does not assure name accuracy, and shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be reasonably to correct errors in names from its records when notified in writing of such errors.

CALLER IDENTIFICATION – BLOCKING PER CALL

Enables a customer to control the delivery of his/her name and/or telephone number to a subscriber of Caller Identification (where technically feasible) by temporarily changing the public/private status indicator of the caller's telephone number. A customer must dial a code before each call to change the indicator from public to private. "Public Status" allows delivery of the name and/or telephone number. "Private Status" prevents delivery of the name and/or telephone number.

CALLER IDENTIFICATION – BLOCKING PER LINE

Provides a permanent "Private Status" indicator on the customer's line. The customer can temporarily deactivate the "Private Status" indicator for a specific call by dialing a code before the call. If a line is equipped with this feature, the name and number of that line will not be delivered to any subscriber of Caller Identification, unless the customer has temporarily deactivated the "Private Status" indicator. Poison control centers, hospitals, medical centers and others who might use Caller Identification will not be able to identify callers with Caller Identification – Blocking Per Line who needs assistance unless the customer has temporarily deactivated the "Private Status" indicator. This feature does not affect ANI based services, including E911.

WN U-7

ORIGINAL SHEET NO. 184.1

INLAND TELEPHONE COMPANY

(N)

SCHEDULE NO. 12  
CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

CALLER IDENTIFICATION -- UNBLOCKING PER CALL

(M)\*

Enables a customer to control the delivery of his/her name and/or telephone number to a subscriber of Caller Identification (where technically feasible) by temporarily changing the private status indicator of the caller's telephone number. A customer must dial a code before each call to change the indicator from private to public. "Public Status" allows delivery of the name and/or telephone number. "Private Status" prevents delivery of the name and/or telephone number.

CALL RESTRICTION

Allows a subscriber to restrict outgoing calls from their line under account code control.

CALL TRACE

Allows a called party to initiate an automatic trace of the last call received. Call Trace is billed on a per usage basis only when an attempt to trace and record the calling number is successful. After receiving the call which is to be traced, the customer dials a Company-defined code and the traced telephone number is automatically sent to the Company. The customer originating the trace will not receive the traced telephone number. The results of the trace will be furnished only to legally constituted law enforcement agencies or authorities upon proper request by them.

CALL WAITING

A function that provides a tone to the party using the telephone to indicate another call is waiting on the line. Successive transfers between parties can be accomplished through switch-hook operation on the line equipped with this feature. This feature is not available on trunk-hunting central office lines.

CALL WAITING/CANCEL

Allows the customer who has Call Waiting the ability to disable the Call Waiting feature for the duration of the call. Cancel Call Waiting is automatically deactivated when the customer disconnects from the call.

WN U-7  
FIRST REVISED SHEET NO. 185  
CANCELING ORIGINAL SHEET NO. 185

INLAND TELEPHONE COMPANY

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

CALL WAITING/DELAYED CANCEL

Allows a subscriber with the Call Waiting feature enabled and invoked to disable the Call Waiting feature for the next call to be received. This feature can be used to cancel call waiting when calling a dial-up/dial-back computer line. In the dial-up/dial back call sequence, the subscriber calls a computer system, enters a personal identification code and then hangs up. The computer then causes a call to be placed back to the subscriber and establish the data connection. Since normal Cancel Call Waiting is operative on the current call only, Delayed Cancel Call Waiting must be invoked to prevent possible interference with the second call by the call waiting tone.

DENY ORIGINATION

This feature denies origination of all calls from a line.

DENY TERMINATION

This feature denies termination of all calls to a line.

HOT LINE – FIXED

Calls originated from a line equipped with this feature are automatically routed to a predetermined specified by the Subscriber to the Company. The number must be specified in standard called number format, but the number of digits that can be included in the format may be limited, depending upon the capabilities of the originating station's service central office.

SCHEDULE NO. 12

CALLING FEATURES (Continued)

DEFINITIONS: (Continued)

PREFERENCE LINE

An additional feature to single-party business local exchange service, offering one (1) additional directory number to which calls can be completed on the same business local exchange service line. Calls to the additional directory number are identified by a distinctive ring. This feature is billed to the primary business exchange line number.

(D)

SELECTIVE CALL ACCEPTANCE

Allows a customer, by dialing a code and directory numbers, to define a list of calling directory numbers from which incoming calls are to be forwarded to a predefined telephone number. Other incoming calls will not be so forwarded. The quantity of directory numbers which may be included on the list is subject to limitation by the Company.

SELECTIVE CALL FORWARDING

Allows a customer, by dialing a code and directory numbers, to define a list of calling directory numbers from which incoming calls are to be forwarded to a predefined telephone number. Other incoming calls will not be so forwarded. The quantity of directory numbers which may be included on the list is subject to limitation by the Company.

SELECTIVE CALL REJECTION

Allows a customer, by dialing a code and directory numbers, to define a list of calling directory numbers from which incoming calls are to be rejected. The quantity of numbers which may be included on the list is subject to limitation by the Company. Calls from directory numbers on the list will be rejected and routed to an announcement stating that the call is not presently being accepted by the called party. A customer may also reject future calls from a directory number from which the most recent call originated by dialing a code immediately after completing the call.
