TC-230178

To: All Concerned

Rocket submits the enclosed proposal to:

- Change our Fare Structure
- Bring the Tariff into compliance

Rocket seeks approval to change our fare structure to the Flexible Fare Schedule enabling us to increase fares for areas that add significant time and cost to the route. With the goal that this also allows us to nimbly follow the ebbs and flows of the economy. The additional revenue will allow us to increase driver pay to again be competitive in the labor market and to add supplemental vans reducing drive time for all. The Base Flexible Fare for BASE, OUTlying, and SATellite zones are our current fares, respectively BASE, OUTLYING, MAXIMUM.

This replacement filing is not just an update to the original Tariff 4 submitted.

During this process, UTC staff has found Tariff 4 to require a full evaluation for a fare increase. In order to move forward with the change to Flex Fare structure, Tariff 4 has been eliminated. This filing is now a complete replacement reverting back to just a modification of Tariff 3. In addition, language provided to Rocket in 2015 was found to now be out of compliance. This language has been removed without replacing it with current compliant language.

To comment regarding this submission, please contact the Utilities and Transportation Commission. This contact may be in person, by telephone, or via the internet. This contact information is current as of submission, but may change.
