I request that consideration of the Rosario Utilities proposed rate increase be suspended until such time as I and other customers of Rosario Utilities have an adequate opportunity to obtain the details of the rate filing and supporting information, and to review and evaluate the proposal. Only a small portion of the "filing" information has been made available and includes only a summary of the proposed rates, and not any of the data supporting the proposal.

I am very concerned about potential overstatement of costs the in the requested rate increase, in particular related to:

- acceleration of depreciation
- incorporation of unpaid construction loan balance into the rate proposal when the assest has been fully depreciated (though not fully paid for by a surcharge)
- the terms of the purchase agreement between Rosario Utilites and Washington Water Service Co. as related to the assumption of the existing loan balance (existence of an agreement, terms of the agreement if it exists, interest rate, payback period, etc.) Was the purchase price in any way

	influenced by the existence of the loan which is held by the owners and sellers of Rosario Utilities? If loan payback is to be an element of future rates all this data is relevant.
