Filing Description*

Comments on PSE (Puget Sound Energy) Integrated Resource P
I do believe that, if it were possible to look into the collective he
of humanity, it would be agreed upon- certainly by the VAST
MAJORITY of Washington citizens- That continued use of dirty an
outdated sources of energy (coal) does nothing to further the he
and well-being of our community or of the health of our planet.
owe it to our residents, our future generations and the entire gl
community to join in and participate in the leading edge of adva
energy options! Please do not let the greed of majority stockhol
outweigh the health of the beautiful Northwest or the health of t
living in and around coal-strip Montana. This is a great oportur
to help shape the look and form of energy consumption for our
future. Thank You!

Comments on PSE (Puget Sound Energy) Integrated Resource Plan:

I do believe that, if it were possible to look into the collective hearts of humanity, it would be agreed upon- certainly by the VAST MAJORITY of Washington citizens- That continued use of dirty and outdated sources of energy (coal) does nothing to further the health and well-being of our community or of the health of our planet. We owe it to our residents, our future generations and the entire global community to join in and participate in the leading edge of advanced energy options! Please do not let the greed of majority stockholders outweigh the health of the beautiful Northwest or the health of those living in and around coal-strip Montana. This is a great opportunity to help shape the look and form of energy consumption for our future. Thank You!
