Re: Docket No. UE-210804 – Developing a Commission jurisdictional specific cost-effectiveness test for distributed energy resources incorporating CETA

Dear Ms. Maxwell,

Avista Corporation, dba Avista Utilities (Avista or the Company), has reviewed the Policy Inventory and DER impacts template attached to the Notice of Opportunity to File Written Comments (Notice) issued by the Washington Utilities and Transportation Commission (Commission) on July 5, 2022 in the above-captioned docket. Due to resource constraints Avista was unable to fully complete the template at this time. However, Avista has reviewed the template filed by Puget Sound Energy (PSE) and generally supports the information PSE has provided. Avista may treat certain elements differently, such as our incorporation of Non-Energy Impacts and Demand Response, but for the most part, Avista is aligned with what PSE provided. Please direct any questions regarding these comments to me at 509-495-2782 or shawn.bonfield@avistacorp.com.

Sincerely,

/s/ Shawn Bonfield

Shawn Bonfield
Sr. Manager of Regulatory Policy & Strategy
