- (2) Inconsistencies with subpart A requirements. If there is any inconsistency between the requirements in subpart B of these rules and those in subpart A, the requirements in subpart B control.
- (3) **Purpose of special rules.** The special requirements in subpart B are designed to standardize presentations, clarify issues, and speed and simplify processing of general rate proceedings.
- (4) ((Summary rejection for)) Failure to comply. The commission, pursuant to WAC 480-07-141, may ((summarily)) reject, or require the company to revise, any filing ((for)) to initiate a general rate proceeding that does not conform to the requirements of subpart B of these rules. ((If)) The commission ((summarily rejects a filing for a 6/26/2018 04:30 PM [1] NOT FOR FILING OTS-9719.2

The company may revise or refile a filing that remedies the noncompliance the commission has identified and otherwise fully complies with the rules consistent with the requirements in WAC 480-07-141(2), which governs the date on which the commission considers a filing to have been made.

(5) Less than statutory notice. The commission may grant requests to alter tariffs on less than statutory notice for good cause shown, in accordance with RCW 80.28.060 (( $\frac{\text{and}}{\text{o}}$ )) or 81.28.050. A company that seeks to implement general rate proceeding tariff changes on less than statutory notice must include with its filing a complete explanation of the reasons that support such treatment.

WAC 480-07-510 General rate proceeding((s)) filings—Electric, natural gas, pipeline, and Class A telecommunications companies.

General rate proceeding filings ((for)) by electric, natural gas,

pipeline, and Class A telecommunications companies as defined in WAC 480-120-034 must include the information described in this section. ((The commission may reject a filing that fails to meet these minimum requirements, without prejudice to the company's right to refile its request in conformance with this section. For purposes of this rule, "file with the commission," means filed with the commission's executive secretary under WAC 480-07-140 at the time the company files its general rate case; whereas "serve" or "provide" to commission staff or another party, means delivery to such persons, not filed with the commission.)) The company and all parties to an adjudication in a general rate proceeding must file all required documents in electronic form consistent with the requirements in WAC 480-07-140 and by the next business day must file five paper copies of all testimony and exhibits unless the commission establishes a different number. If an exhibit is a database, spreadsheet, or model, the paper copy of that exhibit may simply reference or describe its contents if printing the entirety of the database, spreadsheet, or model would result in a document exceeding five pages and would render the data, spreadsheet cells, or model unusable. The party, however, must submit a complete electronic version of the database, spreadsheet, or model, with all

information, formulae, and functionality intact, as part of the
party's electronic filing.

(1) Testimony and exhibits. The ((company must file with the commission nineteen paper copies of)) company's initial filing and any supplemental filings the commission authorizes must include all testimony and exhibits ((that)) the company intends to present as its direct case ((if the filing is suspended and a hearing held, unless the commission preapproves the filing of fewer copies. In addition, the company must provide one electronic copy of all filed material in the format identified in WAC 480-07-140(6). The ((utility must also show)) company must identify each restating and pro forma adjustment and ((its)) the effect of that adjustment on the ((results of)) company's operations and revenue requirement. each witness to public counsel and three copies to staff in a format as described in this subsection. Staff and each other party must provide work papers to all other parties within five days after the filing of each subsequent round of testimony filed (e.g., response, rebuttal). If the testimony, exhibits, or work papers refer to a document, including, but not limited to, a report, study, analysis, survey, article or decision, that document must be included as a work paper unless it is a reported court or agency decision, in which case the reporter citation must be provided in the testimony. If a referenced document is voluminous, it need not be provided, but the company must identify clearly the materials that are omitted and their content. Omitted materials must be provided or made available if requested. The following information is required for work papers:

(b) Organization. Work papers must be plainly identified and well organized, and must include an index and tabs. All work papers must be cross referenced and include a description of the cross referencing methodology.

(e) Electronic documents. Parties must provide all electronic

files supporting their witnesses' work papers. The electronic files

must be fully functional and include all formulas and linked

spreadsheet files. Electronic files that support the exhibits and work

papers must be provided using logical file paths, as necessary, by witness, and using identifying file names. A party may file a document with locked, hidden or password protected cells only if necessary to protect the confidentiality of the information within the cells or proprietary information in the document. The party shall designate that portion of the document as confidential under RCW 80.04.095, WAC 480-07-160, and/or a protective order, and the party shall provide it to any person requesting the password who has signed an appropriate confidentiality agreement.

### (d))) Detailed support for proposals.

(a) General. The company must include in its initial testimony and exhibits, including those addressing accounting adjustments, sufficient all detail, calculations, information, and descriptions necessary to support its requests and proposals and meet its burden of proof. Any party responding to the company's proposal also must include in that party's testimony and exhibits sufficient all detail, calculations, information, and descriptions necessary to support its filed caseproposals.

(b) Capital structure and rate of return. The company must include in testimony and exhibits a detailed ((portrayal)) description of the development of any capital structure and rate of return 6/26/2018 04:30 PM [ 13 ] NOT FOR FILING OTS-9719.2

(e))). Any other party that files testimony or exhibits that propose revisions to the company's current capital structure or authorized rate of return also must provide similar detailed information in testimony and exhibits supporting its proposal.

(c) Restating and pro forma adjustments. ((Parties must provide work papers that contain)) Each party that proposes restating or pro forma adjustments must include in its testimony and exhibits a detailed portrayal of the restating ((actual)) and pro forma adjustments (( $\frac{\text{that the company}}{\text{the party}}$ )) the party uses to support its ((filing or that another party uses to support its litigation)) proposal or position(( , specifying)). That portrayal must specify all relevant assumptions((, and including)) and include specific references to charts of accounts, financial reports, studies, and all similar records ((relied on by the company in preparing its filing, and by all parties in preparing their testimony and exhibits. Testimony and exhibits must include support for, and calculations showing, the derivation of each input number used in the detailed portrayal ((and for each subsequent level of detail. The)), as well as the derivation of all interstate 6/26/2018 04:30 PM [ 14 ] NOT FOR FILING OTS-9719.2

and multiservice allocation factors ((must be provided in the work <del>papers</del>)).

(i) ((Change in methodologies for adjustments. If a party proposes to calculate an adjustment in a manner different from the method that the commission most recently accepted or authorized for the company, it must also present a work paper demonstrating how the adjustment would be calculated under the methodology previously accepted by the commission, and a brief narrative describing the change. Commission approval of a settlement does not constitute commission acceptance of any underlying methodology unless so specified in the order approving the settlement.

(ii) ")) Restating ((actual)) adjustments((")) adjust the booked operating results for any defects or infirmities in actual recorded results of operations that can distort test period earnings. Restating ((actual)) adjustments are also used to adjust from an as-recorded basis to a basis that ((is acceptable for rate making)) the commission accepts for determining rates. Restating adjustments must be calculated based on the unadjusted test year operating results, not on another party's adjustments. The commission may refuse to consider any adjustment that is not calculated consistent with this requirement.

Nonexclusive examples of restating ((actual)) adjustments are adjustments ((to)) that:

- (A) Remove prior period amounts((, to));
- (B) Eliminate below-the-line items that were recorded as operating expenses in error((, to));
- (D) Annualize ongoing costs that the company began to incur part way through the test year;
  - (E) Normalize weather or hydro conditions; or
- (F) Eliminate or ((to)) normalize extraordinary items recorded during the test period.
- $((\frac{(iii)}{"}))$  (ii) Pro forma adjustments((")) give effect for the test period to all known and measurable changes that are not offset by other factors. The ((work papers)) company and any other party filing testimony and exhibits proposing pro forma adjustments must identify dollar values and underlying reasons for each proposed pro forma adjustment. Pro forma adjustments must be calculated based on the restated operating results. Pro forma fixed and variable power costs, net of power sales, may be calculated directly based either on test year normalized demand and energy load, or on the future rate year demand and energy load factored back to test year loads.

(iii) If a party proposes to calculate an adjustment in a manner different than the method the commission most recently accepted or authorized for the company, the party must also include in testimony and exhibits the rationale for, and documents that demonstrate, how that adjustment would be calculated under the methodology previously accepted by the commission and must explain the reason for the proposed change. Commission approval of a settlement does not constitute commission acceptance of any underlying methodology unless the commission so states in the order approving the settlement.

(((f))) (d) Revenue sources. The company must include in
testimony and exhibits a detailed portrayal of revenue from regulated
sources, by source, during the test year and ((a parallel portrayal,
by source, of)) the changes ((in)) that would result in those revenues
((produced by the filing)) if the commission approves the company's
request, including an explanation of how the resulting changes were
derived.

((<del>(g)</del> If the public service)) (e) Achievement of rate of return.

The company must demonstrate in testimony and exhibits why the company has not achieved its authorized rate of return((<del>, an explanation of why it has not</del>)) and what actions the company ((<del>is doing</del>)) has taken prior to and during the test year to improve its earnings in addition

6/26/2018 04:30 PM [ 17 ] NOT FOR FILING OTS-9719.2

to its request for increased rates. If the company has not taken any such actions, the company must explain why it has not.

 $((\frac{h}{h}))$  (f) Rate base and results of operations. The company's testimony and exhibits must include a representation of the company's actual rate base and results of operations ((of the company)) during the test period, calculated in the same manner ((used by)) the commission used to calculate the ((company's)) revenue requirement in the ((<del>commission's</del>)) final order in the company's most recent ((<del>order</del> granting the company a)) general rate ((increase)) proceeding.

((<del>(i)</del> Supplementation of)) (g) Affiliate and subsidiary transactions. The company's testimony and exhibits must supplement, as necessary, the annual affiliate and subsidiary transaction reports ((as provided)) required in rules governing reporting ((requirements for each)) for the applicable industry((for each)) to include all such transactions during the test period. The company (( $\frac{i}{2}$ required to)) must identify all affiliate and subsidiary transactions that materially affect the proposed rates. The company must support the allocation method the company used to distribute common costs between regulated and nonregulated affiliated entities and the dollar amount of those costs.

(h) Electronic documents and confidentiality. Electronic files must be fully functional and include all formulas and linked spreadsheet files. Electronic files that support exhibits must use logical file paths, as necessary, by witness and must use identifying file names consistent with the naming requirements in WAC 480-07-140. A party may file a document with locked, hidden, or password protected cells only if such restricted access is necessary to protect the information within the cells that is not subject to public disclosure. The party must identify each locked, hidden, or password protected cell and must designate such cells, as well as any other information the party contends is confidential under RCW 80.04.095 or otherwise protected from public disclosure, in compliance with the requirements in WAC 480-07-160 and any applicable protective order. The party must make such information accessible to all persons who have signed the protective order or are otherwise entitled to access the information including, but not necessarily limited to, commission staff and public counsel. Redacted versions of models or spreadsheets that contain information that is designated as confidential or highly confidential or otherwise protected from public disclosure must be in .pdf format (using Adobe Acrobat or comparable software) and must mask the

information protected from public disclosure as required in WAC 480-07-160.

- (i) Referenced documents. If a party's testimony or exhibits refer to a document including, but not limited to, a report, study, analysis, survey, article, or court or agency decision, the party's testimony and exhibits must include that document except as provided below:
- (i) A party may include an official citation or internet Uniform

  Resource Locator (URL) to a commission order or to a court opinion or

  other state or federal agency decision, rather than the document

  itself, if that decision is reported in a generally accepted

  publication (e.g., Washington Reports Second (Wn.2d), Public Utility

  Reports (P.U.R.), etc.) or if the document is readily available on the

  web site of the agency that entered that decision;
- (ii) A party may include only the relevant excerpts of a voluminous document if the party also provides a publicly accessible internet URL to the entire document or describes the omitted portions of the document and their content and makes those portions available to the other parties and the commission upon request; and
- (iii) A party is not required to file or distribute materials

  subject to third-party copyright protection but must describe those

  6/26/2018 04:30 PM [ 20 ] NOT FOR FILING OTS-9719.2

materials and their content and make them available for inspection upon request by the parties and the commission.

### (4) Work papers.

- (a) General. Work papers are documents that support the technical aspects of a party's testimony and exhibits. Work papers may include, but are not limited to, calculations, data analysis and raw data. Work papers are not a part of a party's direct case. Within five business days after each party files and serves its testimony and exhibits, the party also must provide to all other parties the work papers on which each of its witnesses relied when preparing testimony and exhibits. All work papers must comply with the requirements of this subsection.
- (b) Organization. Work papers must be plainly identified and well organized, with different documents or sections separated by or into tabs, and must include an index. All work papers must be crossreferenced and include a description of the cross-referencing methodology.
- (c) Any work papers provided to other parties must comply with requirements governing electronic documents and confidentiality in subsection (3)(h) and referenced documents in subsection (3)(i) of this section.

(d) Filing designated work papers with the commission. If the commission determines that it needs information in addition to a party's testimony and exhibits, the commission may issue a bench request for designated portions of that party's work papers. The commission will receive into evidence the work papers a party provides in response to a bench request unless the commission rejects that response, either in response to an objection or on the commission's own motion, as provided in WAC 480-07-405 (7)(b). The commission will not rely on any other work papers as the basis for any finding of fact or conclusion of law in the proceeding unless the commission formally admits such work papers into the evidentiary record.

# (5) Summary document.

(a) Contents. The company must ((file with the commission a summary)) include in its initial filing a document that ((briefly states the following)) summarizes the information in this subsection (5)(a) on an annualized basis, if applicable((.
