

Agenda Date: May 13, 2010
Item Number: A1

Docket: UE-100176
Company: Avista Corporation

Staff: Deborah Reynolds, Regulatory Analyst
Dave Nightingale, Senior Regulatory Engineering Specialist
Ryan Dyer, Regulatory Analyst

Recommendation

Enter an order in Docket UE-100176 approving Avista Corporation's 10-Year Achievable Conservation Potential and Biennial Conservation Target subject to conditions.

Discussion

On April 29, 2010, commission staff presented a memo recommending the commission enter an order approving Avista Corporation's 10-Year Achievable Conservation Potential and Biennial Conservation Target subject to conditions.¹ The commission, after hearing comments from the company and interested persons, approved Avista Corporation's 10-Year Achievable Conservation Potential and Biennial Conservation Target subject to conditions, and asked commission staff to work with interested parties to reach agreement on staff's proposed conditions list.²

Staff initiated review of a revised conditions list via e-mail with the Energy Project, the Northwest Energy Coalition, Public Counsel, the company, and staff. All issues raised by interested parties have been resolved in the revised conditions list, which is attached to this memo.

Conclusion

Staff recommends the commission enter an order in Docket UE-100176 approving Avista Corporation's 10-Year Achievable Conservation Potential and Biennial Conservation Target subject to conditions.
