Subject: Re: Electric rule-making - net metering rule

Danielle,

The NW Energy Coalition is in our Interested Persons list so you got a copy of all the draft rules, including the net metering one. The package or letter was addressed to Nancy. I sent the e-mail about net metering to this other group (net metering group) just to emphasize the communication, given that this group may have particular interest and knowledge in net metering but not in other rules.

You can send us comments in any way you like: a letter to the Commission as you usually do with other issues, an e-mail to me, a fax, and/or you can attend the workshop. You can send your comments up to the time of adoption of the rules, some time next year and you can send comments as many times as you like. I will add all your comments to the electric rule making file, Docket UE 990473.

Thanks!
