Subject: Clean energy sooner
Date: Sunday, October 31, 2021 2:40:22 PM

External Email

If Washington can't get the clean energy aggressively, who can? Please let us capitalize on our abundant hydro, wind and solar resource and get our power utilities to 100% clean energy no later than 2045. Our salmon runs are already taking the hit--let it not be in vain. With determination we could do it sooner. Please let WA be an example to the nation and the world.
