Subject: RE: Report of the Interconnection Standards Workgroup

Thank you, Dave. The Commission has no objection to the Interconnection Standards Workgroup taking an additional two weeks to prepare the Final Report and Recommendations to the Commission. I will ask our Records Center to post this email in our Records Management System.

Subject: RE: Report of the Interconnection Standards Workgroup

Minor correction – I stand corrected in that we have held 3 meetings to date, not 2.

Subject: Report of the Interconnection Standards Workgroup

The Interconnection Standards Workgroup held its second full Group meeting yesterday, June 20, 2012. We made very substantial progress towards a Final Report and Recommendation, originally scheduled for delivery on or before June 29, 2012.

While we did make substantial progress yesterday, there are many details to be worked through by the Group. In order for the Group to provide for full discussion of the remaining items and produce our Final Report, we request an additional two weeks – until July 13, 2012 – to deliver our Final Report and Recommendations.

Respectfully submitted on behalf of CoChairs:

Dave Warren, Washington PUD Association
Tom DeBoer, Puget Sound Energy
Jason Keyes, Interstate Renewable Energy Council
Richard Damiano, Inland Power and Light
