**RE: Compliance Filing—Order 01 in Docket UE-171092
 Pacific Power & Light Company’s 2018-2019 Biennial Conservation Plan**

Pacific Power and Light Company (Pacific Power), a division of PacifiCorp, submits this compliance filing as directed by Order 01 issued on January 12, 2018. This filing is a revision to *PacifiCorp’s 2018 – 2019 Biennial Conservation Plan for its Washington Service Area*, originally filed November 1, 2017, and amended December 13, 2017. Pacific Power has agreed to calculate its additional five percent decoupling commitment using the 2018-2019 biennial conservation target proposed by Staff and identified in Table 1 below (this includes projected savings attributable to Northwest Energy Efficiency Alliance initiatives). This change increases the decoupling target from 3,715 MWh to 3,975 MWh. Table 1 below summarizes the revised targets for the 2018-2019 biennium.

Table 1. 2018-2019 Biennial Conservation Target

Conservation Category	2018-2019 MWh
Cost effective, reliable and feasible conservation	81,500
<i>Less</i> codes and standards adjustment ¹	1,991
2018-2019 biennial conservation target proposed by staff	79,509
<i>Less</i> savings forecasted by the Northwest Energy Efficiency Alliance (not including code and standards)	5,216
2018-2019 biennial conservation target filed by Company	74,293
<i>Plus</i> 5% decoupling commitment ²	3,975
2018-2019 Total Portfolio Savings	78,268

¹ Codes and standards adjustment calculated by Washington Utilities and Transportation Commission staff as documented in the January 10, 2018 Supplemental Open Meeting Memo.

² Five percent decoupling commitment is based on the 2018-2019 Biennial Conservation Target proposed by staff and provided in the January 10, 2018 Supplemental Open Meeting Memo. The calculation is: 79,509 MWh * 5% = 3,975 MWh.
