Fees

Account set-up charge - \$50 Ready-to-serve - \$34/mo Certificate of water availability - \$40

Terms and Conditions

1. Unless otherwise agreed upon in writing, only one single-family unit may use a water service. Any outbuilding, trailer or mobile unit housing a separate family or tenant shall be considered a separate single-family unit and require a separate service connection and meter. The basic charge for this service is not subject to cancellation or reduction for seasonal or temporary periods of time.
2. Owner will provide Burton Water Company a copy of any irrigation system planned, which must show maximum instantaneous demand of system and hours per day and number of days per week system will be used. Burton Water reserves the right to control or regulate irrigation or other uses of water, which affects the performance of the water system.
3. Owners who have residential irrigation systems or other backflow hazards (burtonwater.com/xcc-survey.html) are required to install an approved backflow prevention device and have it inspected by a certified Backflow Assembly Tester at their expense on an annual basis per **WAC 246.290.490**. Burton Water must be provided a copy of the inspection report on an annual basis. Service is subject to disconnection if a device is not installed and tested annually.
4. Burton Water is responsible for services to, and including, the meter and any check valve where a check valve is installed by the utility. Customers are responsible for the installation, maintenance and repairs of their service line (downstream of the utility's meter) on their property. It is the customer's responsibility to check for excess pressure and if needed, install and maintain a pressure reducer.
5. Burton Water will not be responsible for connecting a customer's service line to the meter.
6. Burton Water is not responsible for pressure loss or leaks beyond the meter, and recommends nothing smaller than a 1" water line with 160 psi rating. Lines should be buried at least 18" deep for freeze protection.
7. These rules and regulations set forth the duties and obligations of both customer and Burton Water Company. A copy of the rules and regulations are available on our web site at burtonwater.com. A copy is also provided to the customer at the time the application is completed and service is activated.
8. Monthly water charges will be assessed according to our approved Tariff viewable here: burtonwater.com/tariff.pdf. These charges begin the day the meter is installed for new services. For existing services, the charges will begin the day of legal possession or the taking of water from the meter. Any hook-up fees applicable must be paid prior to the meter installation.

Please Note

As population rises in our region, there is growing pressure to provide housing on Vashon and we have received increasing numbers of calls regarding water availability for accessory dwelling units. An accessory dwelling unit requires a separate water service. Unless otherwise agreed upon in writing, Burton Water does not allow two dwelling units to be served with a single water connection and we are obligated to discontinue service when this is the case. Burton Water Company's water right is fully allocated, and law prevents us from providing new services. Please help us avoid unnecessary enforcement actions by respecting this policy. If you have any questions please call (206)463-0005.
