Subject: Thank you for protecting WA's Clean Energy Future
Date: Monday, December 2, 2019 6:00:06 PM

Dear Washington UTC,

It is a great concern to know that my Electric utility company (PSE) is run by the president of a Natural Gas industry association. It makes business sense that they would want to avoid transparency and full disclosure and build more gas-burning (fossil fuel) plants. This is a great concern to me environmentally. Please stand with me and other Washington consumers and citizens as we lobby for a transparent planning processes that allow for public engagement on all approvals related to utilities and their infrastructures.

This is a comment for Docket # UE 190698.

As a Washington State ratepayer, I am strongly in support of effective public accountability and engagement for investor-owned utilities. I am excited for Washington's Clean Energy Transformation Act (CETA) to take effect, and appreciate your role in making sure that the implementation of this law delivers on its intended vision of a state powered by 100% clean energy.

With that in mind, I would like to make a comment on the importance of public participation in energy planning. Integrated Resource Plans have been a powerful tool for public input here in Washington State, and it has allowed customers to advocate for clean, transparent, and equitable energy decisions. These planning sessions are one of the few oversight and watchdog opportunities we get. Please keep the requirement that they happen every two years rather than every four, as proposed.

As a ratepayer and concerned resident, I thank you for representing my interests and making sure utilities are accountable to the public.

Sincerely,

Van Crozier
