## WHO OWNS HYDRO ONE OF CANADA?

This is the most important information that the commission needs to ascertain on behalf of the citizens of Washington State. We know the Province of Ontario owns 49% of Hydro One, but no one knows who owns the other 51% because unlike with U.S. laws, in Canada ownership can be kept a secret. If it's like the notorious Uranium One deal with Canada....the secret co owner was Russia, which is now buying uranium from the U.S.! Citizens are very angry about that. We do know that utility rates in Ontario are much higher than in Spokane due to their disastrous carbon credit scheme that is bankrupting Canadians. U.S. citizens have thankfully resisted such plans.

Please do not join our region to the failed policies of the shadowy company in Canada that won't tell us who controls their decision making. Say no to the Hydro One purchase of our treasure, Avista Utility. Look at other alternatives that will benefit you and your fellow citizens.

Cindy Zapotocky, President  
Citizens' Alliance for Property Rights

(1728 E. Rockwood Blvd, Spokane WA 99203 Phone: 509-389-1141)

NOTE: Cole STRIP CAN BE CLEANED UP BY AVISTA — BUT RATEPAYERS WILL PAY. DOES ANYONE REALLY BELIEVE THE CANADIANS WILL PAY FOR THIS IF THEY BUY AVISTA.

**Maurice Strong founder of Hydro One**

**This author of the Rio Accord was anti "American sovereignty" that's for sure!!  
He was good friends with the leaders of China and Russia.**

**Quotes: "What if a small group of world leaders were to conclude that the principal risk to the Earth comes from the actions of the rich countries?... In order to save the planet, the group decides: Isn't the only hope for the planet that the industrialized civilizations collapse? Isn't it our responsibility to bring that about?"**

**"The concept of national sovereignty has been an immutable, indeed sacred, principle of international relations. It is a principle which will yield only slowly and reluctantly to the new imperatives of global environmental cooperation. It is simply not feasible for sovereignty to be exercised unilaterally by individual nation states, however powerful. The global community must be assured of environmental security."**

*[WHO WILL RULE US IN PLACE OF THE U.S. CONSTITUTION?]*

★ **"Developed and benefited from the unsustainable patterns of production and consumption which have produced our present dilemma. It is clear that current lifestyles and consumption patterns of the affluent middle class-involving high meat intake, consumption of large amounts of frozen and convenience foods, use of fossil fuels, appliances, home and work-place air-conditioning, and suburban housing-are not sustainable. A shift is necessary toward lifestyles less geared to environmentally damaging consumption patterns."**
