RE: Final Order, Docket No. UT-040535

Nice "reasoning." Way to respond to the arguments. Good resort to the record. (Dubya's legacy? His gang's approach to things trickling down to all levels.)

Having now experienced 'WUTC from top to bottom, it appears fish really do rot from the head down. (Not that the middle or the tail of this fish *need* any help from the head. Phew!)

It all comes back to me now: Everything I used to so *love* about our sick old judicial system and the legal profession.
