1. SINGLE-FAMILY RESIDENCES -

(C)

a. The Company will construct new distribution facilities along a public thoroughfare to serve one or more customers on the following terms:

(1) Distribution Lines for Single-Phase Service -

(a) Primary year-round residences: 300 feet of new line extension per residence at no charge.

(b) Residences other than primary year-round residences: 150 feet of new line extension per residence at no charge.

(c) Charges for footage of new line extension in excess of that allowed in (1)(a) or (b) shall be paid to the Company, in advance of construction, at the rate of \$6.82 per foot.

(2) Distribution Lines for Three-Phase Service - Customers requiring three-phase service shall pay to the Company in advance of construction the estimated cost of constructing such facilities including additional transformers required for three-phase service less credit for equivalent length single-phase facilities calculated on the basis of (1) above. If the actual costs of construction are less than the estimate by more than 10% of the estimate, the Company shall refund any excess payment to the Customer.

(3) Each customer shall pay charges which reflect each customer's responsibility for the extension charges. The Company shall have the right to connect subsequent customers to all line extensions. If such connections are permanent in nature and are made within three years of the date the line extension is energized, subsequent customers so connected shall be treated for purposes of line footage allowances and excess charges

LINE EXTENSIONS

ORIGINAL

1. OVERHEAD DISTRIBUTION EXTENSIONS - The Company will extend its overhead Primary distribution lines (1) along a public thoroughfare to serve one or more Customers or (2) across private property to serve two or more Customers, on the following terms:

a. No charge will be assessed if all of the following conditions are met:

- (1) The line is extended from existing overhead facilities and service is not available in a more feasible manner from underground facilities, and
- (2) the route taken is the shortest practical distance from the Company's existing distribution facilities, subject to considerations of reliability, physical access and availability of operating rights, and
- (3) the costs of construction are not excessive as a result of clearing extraordinary obstructions or other circumstances, and
- (4) the total length of line will not exceed the following footage allowances, such allowances to be determined as follows:
 - (a) If the service is single-phase and is to a permanently occupied year-round residence or is for equivalent or greater annual energy use, the maximum footage allowance shall be 1300 feet for each Customer to be served from the extension.
 - (b) If the service is single-phase and is for nominal energy use (including but not limited to seasonal, non-continuous, or intermittent use), the maximum footage allowance shall be 500 feet for each Customer to be served from the extension. (Does not apply to temporary service. See Schedule 80.)
 - (c) If the service is three-phase, for each \$100 of estimated annual revenue from Customer(s) to be served from the extension, the maximum footage allowance shall be 250 feet of new pole line or 500 circuit feet of conductor on existing poles.

(d) The above footage allowances do not apply to any portion of line extended over private property to serve a single Customer at one or more points. Such lines are subject to the provisions of Schedule 86, SERVICE LINES.

b. Cash payment to the Company in advance of construction shall be required, as follows:

- (1) The amount of the total excess costs of construction which are incurred solely for the convenience of the Customer, providing such construction is agreed to by the Company.
- (2) The amount of any costs incurred by the Company for clearing of extraordinary obstructions or for other unusual conditions.
- (3) The following amounts for all footage in excess of total maximum footage allowable under paragraph 1.a.(4) above:

Single-phase pole line - \$1.25 per foot
 Three-phase pole line - \$2.15 per foot
 Three-phase conductor - \$1.00 per circuit foot

c. Additional Customers may be connected to and served from a line extension at any time, whether or not contributions have been made toward its construction. If such connections occur within three years of completion of construction and are located at a point beyond the aggregate allowable footage for the original Customer(s), such additional Customers will be required to share with the original Customer(s) in amounts contributed for excess footage.

2. UNDERGROUND DISTRIBUTION EXTENSIONS WITHIN PLATTED RESIDENTIAL TRACTS -
The Company will provide and install within a platted residential tract a "Main Distribution System" (an underground electric distribution system exclusive of Service Lines), subject to the following conditions:

a. The tract must not presently be served by an overhead distribution system. An existing overhead distribution system to be converted to an underground system is subject to the provisions of Schedule 70, CONVERSIONS TO UNDERGROUND SERVICE IN RESIDENTIAL AREAS.

among the customers shall be made on the same basis.

- c. Subsurface Transformer Vaults - Charges for each sub-surface transformer vault shall be paid to the Company, in advance of construction, as follows:

Single Phase	Three Phase
25-75 KVA \$1,554	75-150 KVA \$3,754

(I) (M)

Each customer shall pay charges which reflect each customer's responsibility for charges for subsurface transformer vaults. The Company shall have the right to connect subsequent customers to all line extensions. If such connections are permanent in nature and are made within three years of the date the line extension is energized, subsequent customers so connected shall be treated for purposes of determining charges under the provisions of c. above as if they were included among the customers for whom the extension was originally constructed; and reallocations of such charges among the customers shall be made on the same basis.

- d. All the above charges are in addition to those required by the terms of Schedule 86 - Service Lines.

2. PLATTED NEW SINGLE-FAMILY RESIDENTIAL DEVELOPMENTS -

- a. The property owner or developer shall enter into a written agreement with the Company in a form satisfactory to the Company for the installation of an underground system. Under such agreement, the Company will install distribution line extensions within platted new residential developments serving single-family structures to be used as primary year-round residences on the following terms:

SCHEDULE
85
LINE EXTENSIONS
(Continued)

ORIGINAL

(1) Each Customer shall pay charges which reflect each Customer's responsibility for charges for subsurface transformer vaults. The Company shall have the right to connect subsequent Customers to all line extensions. If such connections are permanent in nature and are made within three years of the date the line extension is energized, subsequent Customers so connected shall be treated for purposes of determining charges under the provisions of c. above as if they were included among the Customers for whom the extension was originally constructed; and reallocations of such charges among the customers shall be made on the same basis.

d. All the above charges are in addition to those required by the terms of Schedule 86 - Service Lines.

2. PLATTED NEW RESIDENTIAL DEVELOPMENTS

a. The Company will install distribution line extensions within platted new residential developments if, in the Company's opinion, permanent electric service will be utilized by Customers occupying a substantial portion of the lots in the development within a reasonable time after the system is energized. The property owner or developer shall enter into a written agreement with the Company in a form satisfactory to the Company, for the installation of an underground system. Charges for distribution line extensions within platted new residential developments are as follows:

(1) Overhead extensions or underground extensions utilizing surface-mounted transformers shall be constructed at no charge provided the centerline footage of all roads within the plat does not exceed an average of 70 centerline feet per lot. If the centerline footage of all roads within the tract exceeds an average of 70 centerline feet per lot, such excess footage (number of lots multiplied by excess average footage per lot) shall be charged at the rate of \$11.25 per centerline foot and paid to the Company in advance of construction.

(2) Underground extensions utilizing subsurface-mounted transformers shall be constructed under the terms of 2.a.(1)

- b. The tract contains six or more contiguous building lots.
- c. It is probable, in the Company's opinion, that permanent year-round electric service will be required by Customers occupying a substantial proportion of lots within the tract within a reasonable time after the underground system is energized. Service may be provided to a tract not satisfying this condition on terms which require payment of amounts sufficient to justify the Company's investment in facilities. Such amounts shall be based on the total installed cost, with or without provisions for refund based on the connected load of or revenue from future Customer connections.
- d. The Company shall be compensated for the excess of the underground construction costs over the construction costs of an equivalent overhead system, as follows:
 - (1) The tract owner or developer and the Company shall enter into a written contract for the installation of such system, which contract shall be in a form satisfactory to the Company.
 - (2) The contract shall obligate the tract owner or developer to pay to the Company in cash in advance of construction an amount calculated at the rate of \$2.75 per center line foot of roadway or right-of-way, along which distribution lines are to be laid, which amount shall be in addition to any charges required to extend the Company's overhead or underground distribution system to the tract.
- e. The tract owner or developer shall be required to give written notice to all builders or other purchasers of lots within the tract of the conditions for obtaining permanent electric service as said conditions are set forth in Schedule 86 of this tariff.
- f. Additional Customers, whose Premises lie adjacent to the perimeter of a tract along which underground distribution lines are laid, may be connected to and served from such Main Distribution System at any time. If such connections occur within three years of completion of construction, such additional Customers will be required to share in amounts contributed toward the costs of construction.

(1) If, in the Company's opinion, permanent electric service will be utilized by customers occupying a substantial number of residences in the development within three (3) years after the system is energized, overhead extensions, or underground extensions utilizing surface-mounted transformers, will be constructed at no charge provided the centerline footage of all roads within the plat does not exceed an average of 70 centerline feet per lot. If the centerline footage of all roads within the tract exceeds an average of 70 centerline feet per lot, such excess footage (number of lots multiplied by excess average footage per lot) shall be charged at the rate of \$11.95 per centerline foot and paid to the Company in advance of construction.

(2) If, in the Company's opinion, a plat or development is speculative in nature and it is questionable whether a substantial number of residences in the development will be occupied by customers utilizing permanent electric service within three (3) years after the system is energized, the developer or owner shall pay to the Company \$11.95 per centerline foot of all roads within the development or plat in advance of construction. For each residence utilizing permanent electric service within the first three (3) years after the system is energized, the Company shall refund \$840.00. The total refund to the developer or owner shall not exceed an average of 70 centerline feet per lot multiplied by the number of lots in the development multiplied by \$11.95; in no case shall the total refund exceed the amount paid by the developer or owner under this section.

(3) Underground extensions utilizing subsurface-mounted transformers shall be constructed under the terms of 2.a.(1) or (2) above plus a nonrefundable

3. NON-RESIDENTIAL FACILITIES, MOBILE HOME PARKS, OR MULTI-FAMILY RESIDENTIAL STRUCTURES.

a. For distribution line extensions along a public thoroughfare or across other property to serve non-residential facilities, mobile home parks, or multi-family residential structures, the developer or property owner shall pay the Company the amount by which all construction costs exceed five times the estimated annual revenue from Customers initially to be connected. Underground secondary service lines from the Point of Delivery shall be installed, owned, and maintained by the developer or property owner.

b. Each Customer shall pay excess charges which reflect each Customer's responsibility for the extension charges. The Company shall have the right to connect subsequent Customers to all line extensions. If such connections are made within three years of the date the line extension is energized, subsequent Customers so connected shall be treated for purposes of excess charges as if they were included among the Customers for whom the extension was originally constructed and refunds, if any, to present owners shall be made on the same basis.

4. RECONSTRUCTING DISTRIBUTION LINES FROM SINGLE-PHASE TO THREE-PHASE

a. Overhead - For reconstruction of single-phase overhead distribution facilities to three-phase overhead, the Customer shall pay the Company the amount by which a charge at the rate of \$1.26 per foot of line exceeds five times the annual additional revenue which is estimated will accrue to the Company due to such reconstruction.

b. Underground - The Customer will reimburse the Company the amount by which the costs of reconstructing underground single-phase facilities to three-phase underground will exceed five times the annual additional revenue which is estimated will accrue to the Company due to such reconstruction.

5. OWNERSHIP OF FACILITIES - The Company shall own, operate, and maintain all electric distribution facilities installed by the Company under this schedule.

distribution facilities. The Customer shall install, own, and maintain all secondary facilities beyond the transformer or secondary handhole.

(K)(M)

d. For overhead service at Secondary voltages, the Point of Delivery will be at a point on the outside of the structure to be served which is, in the Company's reasonable judgment, most conveniently located with respect to the Company's distribution facilities.

e. Any additional cost to provide service to a Point of Delivery other than that denoted in this schedule, at the request of the customer, shall be paid by the customer in advance of construction, and such amounts shall be in addition to any other amounts the customer may be required to pay in accordance with this tariff.

f. The Company shall have the right to connect subsequent customers to all line extensions. If such connections are made within three years of the date the line extension is energized, subsequent customers so connected shall be treated for purposes of charges under the provisions of 3.a. above as if they were included among the customers for whom the extension was originally constructed and refunds or reallocations, if any, shall be made on the same basis.

4. RECONSTRUCTING DISTRIBUTION LINES FROM SINGLE PHASE TO THREE PHASE

a. For reconstruction of single-phase distribution facilities to three phase to satisfy customer requirements, the customer shall pay the Company in advance of construction the amount by which the estimated reconstruction cost, including additional transformer costs, exceeds two times the annual additional revenue which is estimated will accrue to the Company.

ORIGINAL

- b. When an underground electric distribution extension is to be installed in a platted tract, the owner thereof shall grant a utility easement specifically to the Company for the extension and shall also record with the plat a restrictive covenant providing that all permanent electric utility service lines shall be underground.
- 8. CLEARING
 - a. It shall be the property owner's, developer's, or Customer's responsibility to provide a route for construction which is to final grade, free of all obstructions, and along which all rights-of-way, easements, and property lines are clearly and accurately delineated.
 - b. The property owner, developer, or customer shall provide written notice to the Company that the provisions of 8.a. have been complied with prior to installation of the Company's distribution system.
- 9. ECONOMIC FEASIBILITY - The Company shall not be required to construct any distribution extension under this schedule if such extension is, in the reasonable judgment of the Company, economically unfeasible. Service may, however, be provided to Customers on terms which require payment of an amount sufficient to justify the Company's investment in facilities.
- 10. TEMPORARY SERVICE - This schedule does not apply to temporary service. Such service is subject to the provisions of Schedule 80 in this tariff.
- 11. GOVERNMENTAL AUTHORITY - The manner and type of construction of any extension of the distribution system shall be subject to applicable governmental authority or law, and any increase in costs resulting therefrom and not reimbursed by an agency of the government or other person or entity shall be paid by the Customer(s) or property owner(s) served by such extension.
- 12. GENERAL RULES AND PROVISIONS - Service under this schedule is subject to the General Rules and Provisions contained in this tariff.

SCHEDULE 85 LINE EXTENSIONS (Continued)

6. PUBLIC THOROUGHFARE - A public thoroughfare may be a municipal, county, state, federal, or other road open to the public in which the Company has adequate operating rights to accommodate the construction, operation, repair, and maintenance of the line extension. Roads are not considered to be public thoroughfares unless they are clearly delineated and have been cleared of growth and obstructions and have been brought to final grade prior to construction of electric distribution lines.

7. OPERATING RIGHTS

- a. Adequate legal rights, including easements and permits for the construction, operation, repair, and maintenance of electric distribution systems installed under this schedule over or through all property, including property not owned by the Customer, shall be provided to the Company by the owner(s) thereof prior to construction of any line extension.
b. When an underground electric distribution extension is to be installed in a platted tract, the owner thereof shall grant a utility easement specifically to the Company for the extension and shall also record with the plat a restrictive covenant providing that all permanent electric utility service lines shall be underground.

8. CLEARING

- a. It shall be the property owner's, developer's, or Customer's responsibility to provide a route for construction which is to final grade, free of all obstructions, and along which all rights-of-way, easements, and property lines are clearly and accurately delineated.
b. The property owner, developer, or customer shall provide notice to the Company that the provisions of 8.a. have been complied with prior to installation of the Company's distribution system.

- b. If the actual costs of construction are less than the estimate by more than 10% of the estimate, the Company shall refund any excess payment to the customer.
- 5. OWNERSHIP OF FACILITIES - The Company shall own, operate, and maintain all electric distribution facilities installed by the Company under this schedule.
- 6. PUBLIC THOROUGHFARE - A public thoroughfare may be a municipal, county, state, federal or other road open to the public over which the Company has adequate operating rights to accommodate the construction, operation, repair, and maintenance of the line extension, and which has been clearly delineated, cleared of growth and obstructions, and brought to final grade prior to the construction of electric distribution lines. A road on private property which meets the above requirements shall be deemed to be a public thoroughfare if such road provides public access to properties which may be served from such line extension. If, in the judgment of the Company, the permanency or definition of any road is questionable, it shall not be considered a public thoroughfare for the purposes of this schedule and it shall be the Company's option to install distribution facilities to serve customers. Such distribution facilities shall not be subject to the footage or revenue allowances provided in this schedule.
- 7. REFUNDS AND REALLOCATIONS - The Company will make every reasonable effort to monitor refunds and reallocations authorized under the provisions of this schedule; however, it is the ultimate responsibility of the person(s) entitled to such refunds or reallocations to notify the Company of the impending or actual connection of subsequent customer(s) which may require refunding or reallocation of funds prepaid to the Company. The Company shall not be liable for refunds or reallocations authorized in this schedule later than five (5) years from the date the line extension is energized.

3. NON-RESIDENTIAL FACILITIES, MOBILE HOME PARKS OR MULTI-FAMILY
RESIDENTIAL STRUCTURES

- a. For distribution line extensions along a public thoroughfare or across other property to serve non-residential facilities, mobile home parks or multi-family residential structures, the developer or property owner shall pay the Company the amount by which all construction costs exceed five times the estimated annual revenue from Customers initially to be connected. Underground secondary service lines from the Point of Delivery shall be installed, owned and maintained by the developer or property owner.
- b. Each Customer shall pay excess charges which reflect each Customer's responsibility for the extension charges. The Company shall have the right to connect subsequent Customers to all line extensions. If such connections are made within three years of the date the line extension is energized, subsequent Customers so connected shall be treated for purposes of excess charges as if they were included among the Customers for whom the extension was originally constructed, and refunds, if any, to original Customers shall be made on the same basis.

4. RECONSTRUCTING DISTRIBUTION LINES FROM SINGLE-PHASE TO THREE-PHASE

- a. Overhead - For reconstruction of single-phase overhead distribution facilities to three-phase overhead, the Customer shall pay the Company the amount by which a charge at the rate of \$1.80 per foot of line exceeds five times the annual additional revenue which is estimated will accrue to the Company due to such reconstruction.
- b. Underground - The Customer will reimburse the Company the amount by which the costs of reconstructing underground single-phase facilities to three-phase underground will exceed five times the annual additional revenue which is estimated will accrue to the Company due to such reconstruction.

5. OWNERSHIP OF FACILITIES - The Company shall own, operate and maintain all electric distribution facilities installed by the Company under this schedule.

- 3. UNDERGROUND PRIMARY DISTRIBUTION EXTENSIONS IN COMMERCIAL OR INDUSTRIAL AREAS OR TO MULTI-FAMILY RESIDENTIAL COMPLEXES - The Company will extend its Primary distribution system underground (exclusive of Service Lines) to serve one or more Customers in an area zoned for commercial or industrial purposes or to multi-family residential complexes, on the following terms:
 - a. No charge will be assessed if the total cost of the underground distribution system, exclusive of transformers, individual Service Lines and meters, does not exceed five times the estimated annual revenue from Customer(s) to be initially connected to the system.
 - b. Service may be provided in areas not satisfying the above condition on terms which require payment of amounts sufficient to justify the Company's investment in facilities. These amounts will be based on the total installed cost, with credits or refunds which recognize the connected load of or revenues from Customers initially or substantially connected.
- 4. UNDERGROUND DISTRIBUTION EXTENSIONS IN OTHER AREAS - The Company will extend its Primary distribution system underground (exclusive of Service Lines) in areas other than those specified in paragraphs 2. or 3. of this Schedule (1) along a public thoroughfare to serve one or more Customers or (2) across private property to serve two or more Customers, on the following terms:
 - a. Payment in cash shall be made to the Company in advance of construction of an amount representing the excess of the underground construction costs over the construction costs of an equivalent overhead system, which amount shall be in addition to any charges required to extend the Company's overhead or underground distribution system to the underground system.
 - b. The total length of equivalent overhead line, including any overhead line required to be extended from existing distribution facilities, shall not exceed the footage allowances set forth in paragraph 1.a. (4) of this Schedule, except that any length of line required in excess of such footage allowances may be constructed subject to payment of the total costs of constructing such additional line.
 - c. Additional Customers may be connected to and served from a line extension at any time, whether or not contributions have been made toward its construction. If such connections occur within three years of completion of construction, such additional Customers will

3. NON-RESIDENTIAL FACILITIES, MOBILE HOME PARKS, OR MULTI-FAMILY
RESIDENTIAL STRUCTURES

a. For distribution line extensions utilizing surface-mounted trans-
formers along a public thoroughfare or across other property to
serve non-residential facilities, mobile home parks, or multi-
family residential structures, the developer or property owner
shall pay the Company the amount by which all construction costs
exceed five times the estimated annual revenue from Customers
initially to be connected. Those customers requiring subsurface
transformers shall pay to the Company the difference in cost of
such transformers from the cost of surface-mounted transformers
in addition to those costs, if any, which exceed five times annual
revenue. Underground secondary service lines from the Point of
Delivery shall be installed, owned, and maintained by the developer
or property owner.

b. For overhead or underground Primary voltage systems, the Point of (N)
Delivery and metering will normally be at a point on the property
line of the premises to be served which is, in the Company's
reasonable judgment, most conveniently located with respect
to the Company's transmission or distribution facilities. The
Company will provide primary metering facilities and the cost of
such facilities will be included in the total costs to provide
service. The Customer shall install, own, and maintain all
facilities on the load side of the primary metering facilities. (K)

c. For underground service at Secondary voltages, the Point of Delivery (K)
will be at the load side of the transformer or secondary hand-
hole if located on the private property being served; or the property
line if the distribution facilities are located on the public right-
of-way. The transformer, handhole, or secondary connection location
shall be at the point which is, in the Company's opinion, most con-
veniently located with respect to the Company's distribution
facilities. (N) (K*)

- 6. PUBLIC THOROUGHFARE - A public thoroughfare may be a municipal, county, state, federal or other road open to the public in which the Company has adequate operating rights to accommodate the construction, operation, repair and maintenance of the line extension. Roads are not considered to be public thoroughfares unless they are clearly delineated and have been cleared of growth and obstructions and have been brought to final grade prior to construction of electric distribution lines.
- 7. OPERATING RIGHTS
 - a. Adequate legal rights including easements and permits for the construction, operation, repair and maintenance of electric distribution systems installed under this schedule over or through all property, including property not owned by the Customer, shall be provided to the Company by the owner(s) thereof prior to construction of any line extension.
 - b. When an underground electric distribution extension is to be installed in a platted tract, the owner thereof shall grant a utility easement specifically to the Company for the extension and shall also record with the plat a restrictive covenant providing that all permanent electric utility service lines shall be underground.
- 8. CLEARING - It shall be the property owner's, developer's or Customer's responsibility to provide a route for construction which is to final grade and free of all obstructions and along which all rights-of-way, easements and property lines are clearly and accurately delineated.
- 9. ECONOMIC FEASIBILITY - The Company shall not be required to construct any distribution extension under this schedule if such extension is, in the reasonable judgment of the Company, economically unfeasible. Service may, however, be provided to Customers on terms which require payment of an amount sufficient to justify the Company's investment in facilities.
- 10. TEMPORARY SERVICE - This schedule does not apply to temporary service. Such service is subject to the provisions of Schedule 80 in this tariff. C

be required to share with the original Customer(s) in amounts contributed toward the costs of construction.

5. OPERATING RIGHTS - Adequate legal rights for the construction, operation, repair and maintenance of Primary or Secondary electric distribution systems over or through all property, including property not owned by the Customer, must be provided to the Company by the owner or owners thereof prior to the commencement of construction of said systems. If the electric distribution system is to be installed in a platted tract pursuant to paragraph 2 of this Schedule, the owner thereof shall cause an easement to the Company for the system to be shown on the face of the plat and shall also record with the plat a restrictive covenant providing that all permanent electric utility services within the tract shall be provided by underground service exclusively.
6. OWNERSHIP OF FACILITIES - The Company shall construct, own, operate and maintain all electric distribution facilities which are subject to this Schedule.
7. ECONOMIC FEASIBILITY - The Company shall not be required to construct any line extension under this Schedule if such line extension is, in the reasonable judgment of the Company, economically unfeasible.
8. OTHER EXTENSIONS - Nothing contained herein shall preclude the Company's right to extend its facilities without charge for any portion thereof if, in the judgment of the Company, such extension is justified by probable future development of the area to be served or by considerations of reliability or continuity of service to its Customers.
9. SUBJECT TO GOVERNMENTAL AUTHORITY - The manner and type of construction of any line extension shall be subject to applicable governmental authority or law, and any increase in costs resulting therefrom and not reimbursed by an agency of government or other person or entity shall be borne by the Customer(s) or property owner(s) served by such line extension.
10. GENERAL RULES AND PROVISIONS - Service under this Schedule is subject to the General Rules and Provisions contained in this tariff.
