Subject: WARNING-DEADLY PSE "SMART" METER PLAGUE APPROACHING THURSTON COUNTY FROM THE NORTH!!-OCTOBER 5, 2018

...I just spoke with a real estate professional who lives and works in a suburb at the far end of King County. "Smart" utility meters -- weaponized digital surveillance meters -- have been stealthily placed without his/her and others' consent by Puget Sound Energy (PSE) on his/her personal residence and in his/her workplace, and this real estate professional told me that this plague was now fast heading south -- in more ways than one -- to Thurston County!

The compromised Washington Utilities and Transportation Commission, (WUTC) Puget Sound Energy (PSE), Seattle City Light (SCL) and almost all utility corporations in Washington State, whether investor or municipally owned, have directly and tacitly lied to the people and committed -- at the very least -- malevolent fraud and criminal malfeasance against the people by enabling this weaponized trespassing, rate-hacking/hiking electromagnetic surveillance technology to be imposed on us without our consent in our homes, workplaces and public spaces.

As I told you earlier, this past Ides of March (how appropriate a date -- it bespeaks betrayal!) I personally attended with several other activists a WUTC meeting during which I publicly confronted PSE representatives for directly lying to me when I had repeatedly asked PSE representatives over the past three years if they intended to install "smart" utility meters.

PSE has also since then tacitly lied to those residing in their service area by not including either in their bills or on their website -- as lamely "suggested" by the corporate-controlled WUTC in their subsequent "guidance" -- any notification whatsoever that these trespassing technologies were about to be imposed without our consent.

The WUTC also directly lied in telling us that there would be another meeting over the summer of 2018, at which expert evidence could be presented to them of the many dangers of "smart" utility meters and 5G wifi. This never happened. This was probably because -- as I reported from evidence I obtained from research done after I attended this meeting -- WUTC officials had been paid off for several years in advance via *de facto* bribes of billions of dollars from US corporate government agencies to work hand-in-hand with investment-owned utility corporations behind the scenes, stealthily to impose this weaponized "smart" grid agenda on the people of this state without our consent.

The mainstream corporate news media here in Western Washington State is also majorly complicit; not one of them has ever done any serious investigative reporting on this deadly corporate government-imposed "smart" meter plague since its beginning here in 2014.

As I have also told you many times, there is a now a powerful, low-cost, out-of-court legal action we can together take to hold perpetrating corporate officers and corporate government officials personally and officially, as well as legally and financially liable for the criminal imposition of these weaponized trespassing electromagnetic technologies. I now suggest that we literally take back our power as empowered human beings, rather than doing nothing as helpless sheep, to implement what in my opinion should have been done six months ago to prevent what is now about to happen in Thurston County, as it has been previously happening throughout the rest of Western Washington State. This is so that another half year is not wasted while electromagnetic technologies far more dangerous than rural cellphone towers are about to be deployed against us. Make no mistake -- these are miniaturized electromagnetic weapons daily targeting us physically in multiple ways via their dangerous radiation, and financially through rate-hiking electronically manipulated billing. They will literally hit us directly where we live, both in our built spaces and physical beings. And those most vulnerable, the especially old and especially young, as well as apartment dwellers with no ability to opt out, will be especially targeted.

As always -- your choice!

Yours all too truly,

Rebecca Em Campbell
