Re: Docket No. UE-011595, Monthly Power Cost Deferral Report, November 2012

Dear Mr. Danner:

Enclosed are an original and five copies of Avista Corporation's Power Cost Deferral Report for the month of November 2012. The report includes the monthly energy recovery mechanism (ERM) accounting journal together with backup workpapers. In November actual net power costs were less than authorized costs by \$1,459,749. The year-to-date difference is \$13,004,449 in the rebate direction. A deferral entry of \$1,313,774 was made in the rebate direction. The year-to-date deferral balance, excluding interest, is \$7,204,004 in the rebate direction, which reflects 75% of the amount within the \$4 million to \$10 million sharing band, or \$4,500,000, and 90% of the amount in excess of \$10 million, or \$2,704,004.

Actual net power costs were lower than the authorized level due primarily to higher hydro generation and low natural gas and power prices. Hydro generation was 77 aMW above the authorized level. The average power purchase price was \$28.32/MWh compared to an authorized price of \$45.67/MWh. The average natural gas price was \$3.53/dth compared to an authorized price of \$4.54/dth.

Colstrip and Kettle Falls generation was 17 aMW above and 13 aMW below the authorized levels, respectively. Gas-fired generation was 320 aMW below the authorized level. The net transmission expense (transmission expense less transmission revenue) was above the authorized level. Washington retail sales were 38 aMW below the authorized level.

Interest is calculated pursuant to the Settlement Stipulation approved by the Commission's Fifth Supplemental Order in Docket No. UE-011595, dated June 18, 2002. Interest is applied to the average of the beginning and ending month deferral balances net of associated deferred federal income tax. The Company's weighted cost of debt is used as the interest rate. The interest rate is updated semi-annually and interest is compounded semi-annually. The January and July reports contain the supporting workpapers for the semi-annual updates of the weighted cost of debt used in the interest calculations. Page 13 of the report for July 2012 shows the calculation of the weighted cost of debt at June 30, 2012, which will be used for the July-December 2012 period.

Changes Semiannually on January 1 and July 1

The rate is based on Avista's actual cost of debt, updated semiannually.

The actual cost of debt calculated at 6/30 will be used for the interest calculation from July through December.

The actual cost of debt calculated at 12/31 will be used for the interest calculation from January through June.

Interest will be accrued monthly and compounded semi-annually.

Interest is calculated using the prior month ending balance plus 1/2 month of current month charges times the current after tax interest rate
