As a PSE customer, I have serious concerns regarding PSE's 2023 Gas Integrated Resource Plan and its 'Preferred Portfolio.' This proposed plan shows minimal progress in reducing greenhouse gas emissions and relies on unproven technology that is not currently available. Moverover, the company intends to pass on the \$10 billion Climate Commitment Act penalties to its customers for its significant emissions. PSE has disregarded viable alternatives that could effectively reduce emissions, stabilize energy costs, and avoid unproven technologies.

I strongly support the Washington Clean Energy Coalition's letter dated May 8, 2023, and urge you to reject PSE's Gas Integrated Resource Plan.

Thank you.
