[EXTERNAL]

Re the PSE request for a rate increase.

I am a low income senior. As described in the Notice PSE sent to residential customers, it appears my rates will rise 4.15% [despite claims of 3.56% elsewhere]. As my primary source of income is Social Security and my other sources are fixed annuities, this will have a negative impact on me. Social Security increases are nowhere near that high. I think that the rate increase should be limited to inflation just as Social Security increases are.
