Subject: Rate increases

I strongly oppose this rate increase. We are seniors on a fixed income and with the current rates we are barely surviving. If these increases happen, we will be forced to sell our home we have been in for almost 30 years. Why is it that these big conglomerates raise everything under the sun, but we don't get nothing including a SS raise.

I guess the government wants to legally do away with the elderly by making it impossible to buy groceries thereby causing legal euthanasia.
