BACKGROUND

- 1 On September 10, 2004, Yakima County, as owner of the Toppenish Simcoe and Western Railroad Company, filed a petition with the Commission, seeking approval to upgrade warning devices at a railroad-highway grade crossing. The crossing is located at the intersection of Signal Peak Road and the petitioner's tracks, in the NW ¼ of the NW ¼ of Section 5, Township 10 N., Range 17 E., W.M., in Yakima County, Washington. Funding for the upgrades is pursuant to the Inter-modal Surface Transportation Efficiency Act, in cooperation with the Washington State Department of Transportation.
- 2 Respondent has consented to an entry of an Order by the Commission without further notice or hearing.
- 3 In the vicinity of the crossing, Signal Peak Road is classified as a major collector roadway, with one lane for each direction of traffic and a vehicle speed limit of 35 mph. The roadway crosses the tracks at a 90-degree angle. Sight distance at the crossing is diminished by the presence of buildings in the crossing's northern quadrants, and a fence paralleling the tracks in the southwest quadrant. Average daily traffic through the crossing is estimated at 2,415 vehicles, including 250

trucks and 10 school bus trips. Average daily traffic is expected to reach 3,622 by 2030.

- 4 Petitioner maintains one mainline track through the crossing. Average daily train traffic includes four freight trains, traveling at a maximum speed of 25 mph.
- 5 Warning at the crossing consists of minimum passive devices. Petitioner seeks to upgrade the existing devices by installing shoulder-mounted signals with gates. The improvements are proposed in the interest of improving safety for roadway users.
