To Whom it Concerns:

I feel this price raise for our water is ridiculous. (Harrison Ray Water Inc.) Our water is bad. Maybe it occasionally passes a few codes, but it stinks, is very warm & we can't drink it.

About a month ago, we had black chips of pipe blocking our main valves. The water pressure was way down. Tom Harrison didn't bother to notify the customers. My valve was cleaned out by a neighbor.

We also have to pay between \$20 + \$30 a month for bottled water for drinking & household use.

I don't think anyone would object to paying more for water, if it was "good" water. This is more like irrigation water.

Sincerely

Kathleen Orando
