RE: Request for 2000 new DID numbers

MEMO

[Redacted] is attempting to consolidate four locations served out of the [Redacted] Central Office into a single number plan at [Redacted]. We currently have 1128 DID's serving these 4 locations but anticipate needing 2000 under the new number plan due to acquisitions and growth within the next 2-3 years. We are running into conflicts with the existing internal company dialing plan.

We will be converting each and every one of the existing DID's over to the new numbering plan and then returning all of the existing DID numbers to you. We anticipate it will take 6-9 months to complete the entire project.

We don't have any specific requirements for the new numbers.

The only restrictions we have is that we can't use 9 as the first of the last 4 digits due to our company's internal dialing plan and multiple locations.
