

December 10, 2007

Dear Kelli Buss,

As you know [REDACTED] ordered 3 Qwest PRI's on November 9, 2007 to replace the current [REDACTED] PRI's for their [REDACTED] located at [REDACTED]. [REDACTED] has also asked to port the current DID numbers over to the new Qwest PRI's. At the delivery time of the Qwest PRI's we were informed that Qwest could not port the DID numbers since the range of numbers with [REDACTED] is not served out of the local CO.

A specific number range is needed to work with the national dialing plan between main offices in [REDACTED]. [REDACTED] needs 700 to 1000 DID numbers. We currently have 1000 numbers in the 425-4000 block from [REDACTED]. The [REDACTED] will need numbers in the XXX-4000 range including 4100, which is the main number at the site. Without numbers in this range they will not be able to use the 3 Qwest PRI's. [REDACTED] has been informed that the local serving office is out of the [REDACTED] numbers in the range we need.

As soon as Qwest can provide usable numbers work can begin on converting the services away from [REDACTED] and over to Qwest.

Please see if a new range of numbers can be opened that will allow [REDACTED] to move this traffic over to Qwest.

Sincerely,

[REDACTED]
