REDACTED

May 8, 2009

Dear Jerry,

[REDACTED] needs 1800 DIDs added to the PRI's for our building at [REDACTED].
The DID's are necessary to implement our enhanced 911 services (PS/ALI) for [REDACTED]. In order to configure our Cisco Call Manager system for [REDACTED] we will need the DID's by July 1st, 2009.
From what I understand [REDACTED] will need a new prefix for the area in order to obtain a sufficient number of contiguous DID's. The contiguous DID's are necessary to maintain ease of implementation and the maintenance that will follow.

Thank you,

[REDACTED]
