Carol and Gordon, Thank You for the quick response. Carol, we will be sending a letter basically say staff understands you are eliminating the master meter system and requesting that both you and CNG notify us when the master meter system is eliminated. Thanks Patti

Hi Carol,

I will go ahead and put the paperwork together for this to happen. I will need the contracts signed and payment made prior to any work beginning.

I would like to hold off on this until the weather changes, like maybe Feb, or early March. If the ground isn't frozen too much anymore, digging should be much easier and no one left without heat for any length of time.

Good Morning Gordon,

I have spoken to my managers and we will be getting out of the Master meter program. We would like to set a time when We could start separating our master meter so each cabin would have Their meter. Please email and let me know our next steps.

I spoke to Patti from St of WA Utilities and Transportation and She had asked if you could send her a email confirming Rader Farms Will be changing out our master meter to individual meters. Her email address is: [pjohnson@utc.wa.gov](mailto:pjohnson@utc.wa.gov) .

Let me know if you have any questions or comments.

Best regards,  
Carol
