RE: Advice 16-02—Schedule 135—Net Metering Service

Pacific Power & Light Company (Pacific Power or Company), a division of PacifiCorp, submits the following revised tariff sheet in accordance with RCW 80.28.050, RCW 80.60.020, and WAC Chapter 480-80. The Company respectfully requests an effective date of June 10, 2016.

The revised tariff sheet is identified as follows:

Second Revision of Sheet No. 135.1 Schedule 135 Net Metering Service

Per RCW 80.60.020(1)(a), not less than one-half of the Company's 1996 peak demand available for net metering systems has been reserved for the cumulative generating capacity attributable to net metering systems that generate renewable energy. This represents 4,550 kilowatts (kW) in available generating capacity, as identified in the Company's current tariff Schedule 135. The Company estimates that customer participation in net metering will exceed the cumulative generation capacity of 4,550 kW identified in Schedule 135 by the end of May 2016.

The purpose of this filing is to remove language limiting the cumulative eligible generation capacity accepted under Schedule 135, effectively allowing the Company to continue offering net metering in excess of the previous threshold of 4,550 kW.

The Company will continue to monitor the impact of customer generation on its system operations and may consider altering or terminating the availability of net metering for new customers at some point in the future to align rate design with the cost of providing service to each customer class.

In accordance with WAC 480-100-193, PacifiCorp has posted the proposed tariff change on its website. This tariff change does not increase recurring charges or restrict access to services. Thus, notice of the proposed tariff change is being given to the public coincident with the date of this transmittal letter through web, telephone, and mail access in accordance with WAC 480-100-193.

Attachment A: List of Tariff Sheets

Attachment B: Schedule 135

Attachment A
List of Tariff Sheets

The proposed tariff sheet to be revised in Pacific Power and Light Company's currently effective Tariff WN U-75 are designated as follows:

Second Revision to Sheet No. 135.1 Schedule 135 Net Metering Service

Attachment B
Schedule 135

PACIFIC POWER & LIGHT COMPANY

WN U-75

Second Revision of Sheet No. 135.1
Canceling First Sheet No. 135.1

**Schedule 135
NET METERING SERVICE**

AVAILABLE:

In all territory served by Company in the State of Washington.

APPLICABLE:

To eligible Customers on a first-come, first-served basis until the cumulative generating capacity of net metering systems equals 9,100 kilowatts. This is a supplemental schedule available to Customers operating on-site generation meeting eligibility requirements as described below.

(C)

MONTHLY BILLING:

The Monthly Billing shall be the Electric Service Charge computed in accordance with the Monthly Billing in the applicable standard service tariff as modified herein.

SPECIAL CONDITIONS:

1. Net Energy billing is available on a first-come, first served basis to a Customer served by the Company that uses a Net Metering System that is a fuel cell, Combined Heat and Power (CHP), or Renewable Energy System, has a generating capacity of not more than one hundred kilowatts, is located on the Customer's premises, operates in parallel with the Company's transmission and distribution facilities, and is intended primarily to offset part or all of the Customer's requirements for electricity. This provision shall be available until an aggregate of 9,100 kilowatts of eligible generation is accepted under this provision.
2. A Combined Heat and Power facility produces electricity and used and useful thermal energy from a common fuel source. A Renewable Energy System is a facility that uses as its fuel either water, solar energy, wind, or biogas from animal waste.
3. Net Energy Metering measures the difference between the electricity supplied by the Company and the electricity generated by an eligible Customer that is fed back to the Company, with applicable safety devices, over the applicable billing period.
4. If the energy supplied to the Company is less than the energy purchased from the Company, the prices specified in the Energy Charge section of the Monthly Billing of the applicable standard service tariff shall be applied to the positive balance owed to the Company.
5. If the energy purchased from the Company is less than the energy supplied to the Company, the Customer shall be billed for the appropriate monthly charges and shall be credited for such net energy with a kilowatt-hour credit appearing on the bill for the following billing period.
6. Any remaining unused kilowatt-hour credit accumulated through the April billing period each year shall be granted to the Company, without any compensation to the Customer.
