---

Water service must be subscribed to on an annual basis. No proration or reduction in billing is allowed unless this tariff proscribes temporary or seasonal rates.

**Rule 19 – Cross Connection Control**

The customer shall not permit the plumbing on their premises to be connected to any source of water supply other than the Utility's, or to any potential source of contamination, without first obtaining the Utility's written permission and meeting the Utility's cross connection control criteria. The utility will assure that effective back-flow prevention measures are implemented to ensure continual protection of the water in the public water distribution system. Any back-flow prevention assembly deemed necessary by the Utility to prevent entry of contaminants to the public water system except where plumbing code requires their installation shall be installed by the utility. It is the aim of the utility to have all residences protected by an approved backflow prevention assembly installed immediately after the utility's point of delivery (meter assembly). Until that is established, customer owned backflow protection will be tested and maintained by the utility. The customer may choose to use another approved backflow assembly tester of their own choosing instead.

T  
T  
T  
T

**Rule 20 – Backflow Assembly Testing and Inspection**

If the customer has an Approved Backflow Prevention Assembly installed the assembly will be tested annually by a certified Backflow Assembly Tester (BAT) specialist paid for by the utility (as deemed necessary by the utility) unless there is an approved backflow prevention assembly installed as described in Rule 19 (approved whole house backflow assembly) which will be the only one tested unless customer requests and is willing to pay current charges for the service. If access is denied for the purpose of installing, testing or maintaining a backflow assembly the utility will provide a notice of disconnection pursuant to WAC's for discontinuing of service for water utilities.

**Rule 21 – Limitations of Liability**

The Utility's liability, if any, for its gross negligence, willful misconduct or violation of RCW 19.122 is not limited by this tariff. With respect to any other claim or suit, by a customer or by any other party, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, the Utility's liability, if any shall not exceed an amount equal to the proportionate part of the monthly recurring charge for the service for the period during which the service was affected.

There shall be no liability for consequential or incidental damages. The Utility clearly disclaims

**SCHEDULE NO. 2**  
**METERED RATE SERVICE**

**Availability**

This schedule is available in all Water Service Areas served by the Utility and at Utility's option and capability to maintain Department of Health standards of quantity and quality.

**Applicable**

Applicable to domestic residential customers served by the Utility on a metered basis.

**Conditions**

The charge for this service is not subject to cancellation or reduction for seasonal or temporary periods, unless seasonal rates apply per this tariff. This charge will be the monthly minimum bill for this class of service.

All metered rate service has zero allowance for water usage in base rate. Rates are shown per 100 cubic feet. Billing for any block is calculated on a per cubic foot amount based on the 'Rate' charge of that block. The measurement is taken from the meter starting from the 100's of cubic feet dial on the meter – there is no rounding up or down to make a reading.

I

**SCHEDULE NO. 4**  
**CROSS CONNECTION CONTROL** (cont'd)

C

**Conditions** (cont'd)

**Non-Response Options:**

- a. Site Visit letter/appointment for on-site review of cross connection potential, followed by a Site Visit for determination of cross connection potential as defined in WAC 246-290-490. The customer will be assessed the charges set forth in the rate section above.
  - b. Installation of Approved Backflow Prevention Assembly at customer's expense or as set forth in the rate section above.
  - c. Notice of disconnection of service per WAC 480-110-355 (3)(a).
3. An on-site inspection is required for every customer meeting any criteria of WAC 246-290-490 (4)(b) Table 9. The customer will be assessed the appropriate charges set forth above.
  4. If a cross connection is detected or is reported by the customer, then the Utility will determine the appropriate remedy. If an Approved Backflow Prevention Assembly is required, the Utility will determine the type of Approved Backflow Prevention Assembly that must be installed unless governed by plumbing code. In which case the customer is responsible for installing the backflow assembly. The Approved Backflow Prevention Assembly will be installed on a customer's side of the service connection
  5. The Utility shall ensure that personnel, including at least one person certified as a cross-connection control specialist, are provided to develop and implement the cross-connection control program.

**SCHEDULE NO. 4**  
**CROSS CONNECTION CONTROL** (cont'd)

C

**Conditions** (cont'd)

6. No less often than every three years, the Utility shall re-survey its customers concerning the existence of cross connections. If the customer does not respond to the initial survey, a second survey will be sent. If the customer does not respond to the second survey, then non-response options listed in paragraph 2 will apply.
7. For each customer meeting any criteria of WAC 246-290-490 (4)(b) Table 9, no less than every three years, the Utility shall conduct a site visit, premises inspection and shall assess the customer the charges set forth in the rate section above.
8. When necessary, the Utility will provide notices of disconnection as required in WAC 480110-355 (3)(a).
9. If service is disconnected, the Utility will charge the customer its current Reconnection Visit Charge as described in **Rule 6** of this tariff.
10. The Utility may immediately shut off water service if a public health emergency exists, including when a backflow is occurring, or an unprotected cross-connection with sewage or an unapproved water source exists.
