Subject: RE: Loading Platform Clearance Waiver

Hi Bob,

Here are the measurements we need for the waiver as we discussed today.

Side clearance measurement for the Biodiesel piping - 6'5" from the piping to the middle of the rail car

Overhead clearance for the new installed SafeRacks - 18' 6" (This is from the bottom of the safety cage)

One "low vertical clearance" sign to be installed on the rack that is visible from entering the facility at the rail gate entrance.

Thanks again and it was very nice to meet everyone.

Subject: [EXTERNAL] Loading Platform Clearance Waiver

Hello Scott,

We have received the necessary documentation from Jeff Carter regarding the overhead and side clearance waiver for the tank car loading platform located at the port of Vancouver. Our site visit to the facility is scheduled for June 10 at 10:00 am. I will be accompanied by our Rail Supervisor, Evan Enright, and Transportation Planning Specialist, Mike Turcott. Can you provide me with the physical address where we will meet on June 10?

Thanks,

Bob Boston
