## NOTICE OF RATE INCREASE

Waste Management

Dear Valued Customer:

Thank you for working through our contractual differences over these past few months. Based on our conversations we are happy to have provided clarity on the matter.

Due to increased environmental regulation requiring new and costly special handling and processing of the of residential commingled yard waste/food waste at our composting facilities, we have found it necessary and appropriate to increase our tip fees. This fee increase will be effective **January 1, 2021**.

- Commingled Residential Yard Waste/  
Residential Food Waste \$ 65.00/ton

We appreciate your business and will continue to offer an environmentally sound low-cost alternative to the landfilling of compostable materials.

Sincerely,

Cedar Grove
