---

Good afternoon Jon,

On 3/14/21, our locate service provider (ELM) mis-marked a gas main near 4500 Talbot Rd S in Renton. This mis-mark was caused by the locating signal bleeding off onto another abandoned facility nearby. There are no additional details to present regarding this incident; however, PSE has taken additional steps recently to mitigate issues such as this and I look forward to discussing these at our review next week.

Thank you,

Jeff Horton
