RE: Trilogy Medwaste LLC- G-069597

Enclosed for filing today are revised Tariff No. 4 Cover Page and additional services to Item 30 (Note 6) for Trilogy Medwaste West, LLC (G-069597).

This filing represents an added new service option that has not been previously included in the Company's tariff (WAC 480-70-26). The service option added is a 'per pound' pricing option to be able to propose services to State and Federal Contracts that require 'per pound' pricing for Biohazard Waste Collection.

The data attached shows 2 months of collection data for containers and weights of containers. The rates proposed are and average rate per pound that is in line with the current rates. Each container has a different average weight, the final proposed rate is an average between the three containers available for Regulated Medical Waste Collection.

The addition of 'Note 6' in Item 30 includes the proposed new service option for rates per pound. This is the only change that is proposed.

Sincerely,

Jeffrey D Norton
