Subject: BR1 - data from Paine field

Dear Judge Friedlander,

Unfortunately, the data collection has taken me longer to achieve than what I had expected. We are about 80% done as I write this. I am gathering last year's data to get a good feel for the amount of business we do. Because of the nature of the specificity required (as opposed to looking at just a zip code for instance) it is taking us a little longer to sort through the queries. My IT person works until 9:00P tonight so am still holding hope he will be done tonight. If not he should be done tomorrow afternoon.

I apologize I did not let you know a little sooner. I will forward you the information just as soon as we are done.

Sincerely,

John Rowley
