Respondents' request to follow reply in these proceedings responding to Murrey's Disposal's response.

1.3

information.

I had several legal questions for each party after reviewing the motion and the response. We are here today because I determined that holding a hearing on Respondents' motion to dismiss was the best course in order to provide the parties the opportunity to complete any presentation of their positions and afford me the chance to plainly ask any unanswered legal questions I may have after the parties' presentations.

Each side will have 15 minutes for their presentations with Respondents going first as the movants. The Respondents can save some of their time if they wish to address anything raised by Murrey's Disposal.

At the conclusions of the parties' presentations, I will pose any remaining legal questions I have for each party, and I intend to listen to all of the presentations before posing any remaining legal questions I have.

Before we get to the purpose of this hearing, let's take appearances from the parties' representatives. Short appearances are sufficient for this hearing as Respondents' representatives have filed a notice of appearance and the representatives from

out about it, so I'm very happy that you had actual notice, but I want to make sure that we get everything sent to you.

Page 7

Page 8

sent to you.
 MR. FASSBURG: Very good.
 JUDGE O'CONNELL: All right. And for

Respondents?

MS. GOLDMAN: Good afternoon, Your Honor.

My name is Jessica Goldman. I'm from the law firm

My name is Jessica Goldman. I'm from the law firm
Summit Law Group, and I represent all of the respondents
in the combined complaint. Along with me on the line is
my partner, Jesse Taylor, and Andrew Kenefick, the
inside counsel for Waste Management, and Michael
McBride, who is the outside regulatory counsel for Waste
Management in Washington DC.

JUDGE O'CONNELL: Okay. Thank you. Are there any matters we should address before we get to the presentations by the parties?

Okay. Hearing none, I have a timer and I will alert the parties when their time for presenting is over. So I would like to turn to Respondents.

Would you like to save any of your 15 minutes for responding to Murrey's Disposal?

MS. GOLDMAN: Yes, Your Honor. I'd like to reserve three minutes.

JUDGE O'CONNELL: Okay. I will put 12

Page 6

Murrey's Disposal have included their identifying information in the complaint.

will be here and present today.

Let's -- let's begin with Murrey's Disposal.

MR. FASSBURG: Good afternoon, Judge
O'Connell. Blair Fassburg with Williams Kastner on
behalf of Murrey's Disposal. And as indicated, on the
line, Dave Wiley, who also represents Murrey's Disposal,

JUDGE O'CONNELL: Okay. Thank you. Now, my understanding is that you recently submitted a letter requesting to make sure that you are included on the master service list for those proceedings. And although your information was included in the complaint, I'd like to ask that you submit a formal notice of appearance to the dockets to make sure that you're not omitted from any service from the Commission, and that will make sure we have all of your identification and contact

MR. FASSBURG: Absolutely, although that typically hasn't been required in past practice, we'd be more than happy to do that.

JUDGE O'CONNELL: Great. And I'm aware. Let's just double cross our Ts in this instance because I don't want -- I'm aware that you missed a certain notification of an order that was issued. You did find

minutes on my timer, and I will begin whenever you're ready and whenever you start.

MS. GOLDMAN: Thank you, Your Honor, and good afternoon. Murrey's complaint concerns what is called trailer on flat car transportation or TOFC, and there's no dispute that that is what is at issue here. TOFC is the continuous intermodal movement of containerized property including both a highway and a rail segment. The question of law that's presented here today is whether the UTC may regulate the highway segment of the TOFC movement of containerized solid waste.

Your Honor, the answer to that is no as a matter of law. Your Honor is not presented here with a novel issue. This is settled law for almost 30 years. And I begin with what Congress has decreed.

Congress authorized first the Interstate
Commerce Commission, the ICC, and then later it's the
Surface Transportation Board, the STB, with jurisdiction
over transportation by rail carriers and specifically
noted in the statute that the jurisdiction was
exclusive. That statute is 49 USC Section 10501, Sub B.
I will be referring to the board here to refer both to
the ICC and the predecessor and the STB, the successor,
as all of the regulations and laws have been the same.

2 (Pages 5 to 8)

Page 9

Congress defined what it meant by transportation in this exclusive broad assignment of jurisdiction to the board. In this statute, Congress defined transportation to include a vehicle related to the movement of property by rail regardless of ownership and to services related to that movement. And that definition is found in 49 USC Section 10102, paren 9.

1.3

1 2

So Congress expressly granted to the board but not to states the jurisdiction to regulate transportation by rail carriers. In this regulatory scheme, Congress also authorized the board to exempt from federal regulation services that were subject to the board's exclusive jurisdiction and which related to a rail carrier providing transportation and which the board determined in the exercise of its exclusive jurisdiction and discretion were not requiring any further or additional federal regulation. And that exemption authority is provided in 49 USC Section 10502, Sub A, Sub 1.

Finally, as part of this regulatory scheme, Congress authorized the board as part of its exclusive jurisdiction to revoke exemptions previously entered if, in the determination of the board, it was now once again appropriate and necessary for federal regulation of -- of its jurisdiction. And that revocation authorization

Page 11

Then for the second time, in 1987, the board exercised its exclusive jurisdiction and expanded the TOFC exemption. This time it expanded it to include transportation by a motor carrier either as the agent or the joint rate partner of a rail carrier.

Then finally, for the third time, in 1989, the board exercised its exclusive jurisdiction and considered whatever the TOFC exemption should be expanded to cover pickup and delivery operations independently arranged with the motor carrier.

The opponent of this contemplated regulation with the motor carriers, and they argued to the board in the rulemaking that the board could not take that step because taking that step was not related to a rail carrier providing transportation because it was not service provided by the rail carriers. That's exactly the same argument that Murrey's makes today to the UTC.

The board rejected this argument and ruled the highway movement of containers and trailers is an integral and necessary element of TOFC service. So the board exercised its exemption authority and adopted 49 CFR Section 1090.2 and that is the CFR exemption that's been cited in both of the parties' papers to Your Honor. That is a — is a broad exemption and I want to just focus on two parts of this exemption.

Page 10

is found in 49 USC Section 10502, Sub D.

So in this regulatory scheme, Congress gave the board broad exclusive jurisdiction over transportation by rail carrier, and that included the authority to regulate, it included the authority to exempt from federal regulation, and it included the authority to revoke exemptions and to reinstate regulation as deemed proper by the board.

In the exercise of this exclusive jurisdiction, the board in 1989 considered TOFC services. Now, this was the third rulemaking by the board considering and regulating TOFC services. Previously, eight years previously in 1981, the board exercised its exclusive jurisdiction and exempted from federal regulation the highway portion of TOFC services, but only if the rail carrier itself was performing the highway transportation in rail-owned trucks.

That exemption was challenged and the Supreme Court eventually upheld it in ICC versus Texas in 1987. And the Supreme Court in that decision ruled that the Commission's power to grant exemptions is coextensive with its own authority to regulate or not to regulate these intermodal movements by rail carrier confirming that, indeed, the exemptions as part of the jurisdiction of the board.

Page 12

The first part is that it exempts from federal regulation TOFC service provided by a rail carrier either itself or jointly with a motor carrier as part of a continuous intermodal freight movement. Regardless of the type, affiliation, or ownership of the carrier performing the highway portion of this service.

That exemption, that regulation, also provides that motor carrier TOFC pickup and delivery services arranged independently with the shipper or receiver and performed immediately before or after a TOFC movement provided by a rail carrier are similarly exempt. So with this third rulemaking, the board effectively deregulated TOFC services.

Now, the motor carriers challenged this regulation and this exemption that the final version of -- and it -- and they argued that the board's exemption authority was limited to only transportation, quote, provided by a rail carrier, end quote. Again, the same argument that Murrey's makes here.

The DC Circuit in Central States in a decision authored by then Judge Ruth Bader Ginsburg rejected this argument. The DC Circuit concluded with little difficulty, those are its words, that the board had jurisdiction over motor carrier operations that are closely related to TOFC rail transportation even though

Page 13

the rail and motor carrier segments are contracted for and billed separately. So the DC Circuit upheld the exemption.

1 2

Now, I want to be clear here because there has been confusion generated by the response brief about why this exemption matters, why this CFR provision is relevant here. It's not relevant here because it itself exempts UTC regulation. As I noted and as is clear from the statute and the regulation, it only exempts federal regulation. That regulation is relevant here because it confirms that Congress's broad grant of exclusive jurisdiction over rail transportation to the board includes all TOFC service no matter who provides the motor carrier segment or under what terms.

In Central States, Judge Ginsburg for the court wrote exercise of the ICC's exemption authority neither lodges nor dislodges agency jurisdiction. It presupposes ICC jurisdiction over the persons or services exempted. So the exemption itself required that the board had jurisdiction over all parts of any TOFC movement in the first place before the board could take action to promulgate the exemption. And that jurisdiction by statute is exclusive over rail transportation.

Congress has never disapproved 49 CFR

facts in the law correctly, but I think there are a few discrepancies that need to be pointed out.

Page 15

Page 16

What I'd like to start even earlier than that, what's at issue in this case are not just whether or not the services provided by the Respondents are or are not subject to UTC regulation. The position being taken by the Respondents is so long as solid waste is loaded onto a train, it doesn't matter where it started and how it got there. All services being provided leading up to rail transportation of solid waste would be preempted according to the Respondents' position.

That means all economic regulation beyond just the UTC's requirement that a solid waste collection company comply with RCW 81.77. This would implicate municipal taxes, this would implicate state taxes, this would implicate regulatory fees. And what they're planning essentially is that so long as you load it onto the train, any trucking company who does not therefore have to comply with state environmental regulations or state economic regulation as to price would be required to comply. They can just do whatever they want because there's no state regulation.

And by the way, there's no federal regulation of this service either, so they're claiming essentially that they're free from regulation to do as

Page 14

Section 1090.2 or the longstanding Central States' decision confirming the board's jurisdiction over TOFC movements. They remain the law now nearly 30 years later.

Murrey's is asking the UTC to make an unprecedented assertion of authority here to regulate a highway transportation of solid waste that is an integral part of a continuous intermodal rail transportation service. Murrey's invitation to assert state authority over conduct that Congress has expressly preempted from state regulation should be rejected.

And, Your Honor, I would reserve the remainder of my time.

JUDGE O'CONNELL: Okay. You have an additional 30 seconds, so I will mark that as three minutes and 30 seconds that you may reserve for responding to anything that Murrey's Disposal brings up.

Okay. Let's turn --

MS. GOLDMAN: Thank you, Your Honor. JUDGE O'CONNELL: You're welcome.

Let's turn to Murrey's Disposal,

Mr. Fassburg. I'm going to set my timer for 15 minutes and you can begin when you're ready.

MR. FASSBURG: Thank you. So, Your Honor, I believe Ms. Goldman did, in fact, describe some of the

they choose, and those are not policies that the state should encourage.

Now, the state's regulation of solid waste collection is something that U.S. Congress has explicitly recognized as an important police power of the state for the public health and safety. And so in the context of motor carriage of solid waste, the U.S. courts have determined there is no preemption of, for example, intrastate transportation of solid waste generated within the state, and there is -- it is permissible for the state to engage in economic regulation, for example, requiring a company obtain a certificate to provide solid waste transportation via a truck.

Now, that's important because what was not explained by the Respondents is that all of these cases and these exemptions were created in the context of a different regulatory regime than exists today. Rail transportation was preempted at a previous time than trucking. In 1989 and 1987 and 1991, state regulation of trucking was still allowed. It wasn't until 1994 that the state regulation of trucking was preempted by the FAAAA.

So understanding that is important to the outcome here because when each of these steps was taken,

4 (Pages 13 to 16)

1.3

Page 17

Congress allowed the regulation of trucking at the federal level and at the state level. At the federal level, the ICC was in fact the regulatory agency with jurisdiction over interstate trucking, and it was the UTC here in Washington that had jurisdiction over the regulation of intrastate trucking.

Now, what's at issue in this case is a leg that occurs entirely within the state transportation from either Port Angeles or Port Townsend to another point within the state. That would be intrastate trucking. Absent any sort of preemption argument, that would absolutely be subject to the jurisdiction of the UTC under the cited case law.

Now, what Respondents claim is that because that leg is to a rail train loading facility and the material is then loaded onto a train, the UTC would not have authority to regulate that leg.

Well, interestingly, that issue was addressed in ICC versus Texas, one of the very cases the Respondents rely upon to claim there's preemption. Interestingly, if you're -- if you review the cases cited by the Respondents, not a single one of them addresses preemption of TOFC service. Instead, every single one of theme deals with whether or not the ICC has the authority to exempt from regulation, this

Page 19

Page 20

Respondents apparently rely upon but also this claim relies upon, are the exemptions in 49 CFR 1090.2. In the history of those exemptions and their words give meaning to what's at issue in this case, what was first exempted in 49 CFR 1090.2 was TOFC/COFC service being provided by a rail carrier in equipment that it owned.

Now, it's important to understand that when that happened, railroads were competing with motor carriers for basically door-to-door service. And in the history of those exemptions, it discusses and, in fact, the case law cited by the Respondents, it discusses how railroads were preventing TOFC/COFC service. So the first real phase in deregulation of TOFC/COFC service was essentially forcing the railroads to allow that through door-to-door service to occur.

The next step said if a rail carrier is actually providing the motor carrier service so that it can compete with motor carriers, that would be considered by a rail carrier. And, again, this is in the context of the exemptions.

Then they took it a step further and said that if the motor carrier is providing jointly with the rail carrier or as its agent, they can be exempted too. But they refused to go one step further than that and say if the motor carrier is the one arranging for this

Page 18

TOFC/COFC service.

1.3

In ICC versus Texas, the very -- the issue that was central to that case was whether or not the State of Texas had authority to continue its regulation of intrastate TOFC service. After phase two or plan two, TOFC service had already been exempted by the ICC. And what the U.S. Supreme Court stated is that the ICC had authority to exempt state regulation TOFC service.

Now, if it were true that broad rail carrier preemption already existed, it would have been unnecessary for the Supreme Court to reach that decision. Because if broad preemption of -- by motor carrier TOFC service had already existed, there would be no need for any such exemption. So clearly, the authority to regulate by the state was presupposed by that decision.

Now, I find it interesting that the Respondents argue that CR -- 49 CFR 1090.2 does not provide exemption of state regulation, because if there is the authority to regulate by the state under the ICCTA, which the U.S. Supreme Court clearly indicated there was in ICC versus Texas, the fact that 49 CFR 1090.2 only exempts federal regulation, that means that the state remains free to regulate.

Taking this step one step further, what the

service, if it's the true through carrier and it's only replacing a segment of its own service with rail

service, that is not exempted.

The final phase of the exemptions that were addressed by Respondents were that pickup and delivery service. Now, that service was given broad-brush treatment. Pickup and delivery service may not be something that's broadly understood today due to the deregulation of trucking in 1994. The pickup and delivery service dealt with a local area. It was either in the terminal area or in a commercial zone. That would typically have been defined as we've addressed in our response brief to be basically within the confines of a single city or its metropolitan area.

It is unquestioned and undisputed in this case we're not dealing with services within a single commercial zone or a terminal area. The service is pickup from Port Townsend Paper or McKinley Paper and delivery to a place in a different county. And so that third and final leg of the exemptions does not apply to this service. Instead, this service falls fully -- or falls fully within plan one TOFC/COFC service where the motor carrier is the one that provides the service and it subcontracts to the railroad. And that is the facts -- the facts, I'm sorry, that has been admitted

5 (Pages 17 to 20)

Page 21

for the purposes of this motion are that Waste Management subcontracts to the railroad, and so they don't even fall within the exemption scheme that they now claim is related to their claim here.

1.3

1 2

Now, finally, the issue that was mischaracterized with respect to our position about whether or not service is by a rail carrier or related to a rail carrier. There is a difference between exemption authorities and preemption authorities.

Now, what's at issue in this motion is the preemption authority. Respondents have claimed broadly that, because the ICC now the STB, have jurisdiction over rail transportation, that should apply to service that is decidedly provided by someone other than a rail carrier. This is a trucking company, this is Waste Management of Washington, and this is a landfill, or that the three parties in each of these two proceedings fit those descriptions. None of them is a rail carrier.

Now, why that matters is because rail carrier was clearly defined within the statute that provides the jurisdiction of the board. 49 USC 10102 defines rail carrier as a person providing common carrier railroad transportation service for compensation, and it goes on, but it does not include related to a rail carrier. That language related to a

railroad -- rail cars owned by the railroad. And that large disconnect in the relationship establishes that there is no preemption as to these services.

Page 23

I'll see if there's any other notes I have that I wanted to relay before I conclude my points, but I believe that covered it. I think -- I think that does conclude it. Thank you.

JUDGE O'CONNELL: Okay. Thank you, Mr. Fassburg.

I'm going to set my timer for three minutes and 30 seconds. Ms. Goldman, whenever you begin, I will start the timer. Thank you.

MS. GOLDMAN: Okay. Thank you, Your Honor. I will try to be as quickly -- quick as I can to address these issues.

The key thing here you did not hear from Mr. Fassburg is that there's no dispute that what you're looking at here is TOFC. There's no dispute. That is what you're looking at here. You're not looking at a transload facility, you're not looking at construction of some -- some facility that's adjunct to a railhead. You are talking here about TOFC service.

He broadly misstates what the issue is before the Court to say that solid waste loaded onto a train, it doesn't matter how it got there or who it's

Page 22

rail carrier is included only within the exemption authority of the ICC.

And so when the ICC can exempt from regulation something that isn't by a rail carrier, that is a different question as to whether or not it is automatically preempted by the broad sweep of the ICC's jurisdiction.

So the cases that we've cited addressing preemption where it relates to service being provided by a rail carrier have been very narrowly construed to apply only to agents of railroads. It typically relates to service being provided at a train load facility, but it does not limit it -- it's not limited to that, but it doesn't go very far beyond that.

A review of the case law will demonstrate that only if they're an agent of the rail carrier and then providing transportation services typically on property owned by the railroad are -- do preemption arguments extend beyond the rail carrier itself. And, again, those arguments don't apply here. This is not transportation on railroad property, using railroad property, or by a rail carrier. This is transportation of solid waste on trucks owned or leased by a trucking company to a transload facility that is not owned by the railroad onto -- then onto rail cars owned by the

 $\label{eq:page-24} {\mbox{Page-24}}$  from and then it gets dumped onto a train is inherently

what you are deciding today, and, Your Honor, that is very much not what you're deciding today.

This is a narrow situation. It's -- it's the type of fact pattern that is going to occur very rarely. We're not talking about a Waste Management truck going to a railhead and then dumping its waste on the ground and then being transloaded to a train. We are talking about what is clearly understood to be TOFC. These are containerized waste that go from one -- one leg of transport that is by truck to the other leg of transport that is by train exactly as they were initially loaded.

The cases that are -- have been cited by Murrey's don't concern preemption under this statute. They concern preemption issues raised under the Commerce Clause, and they concern the FAAAA, which concerns aviation. They have no bearing whatsoever on the issue here, which is this statute, which clearly says on its face that state regulation is not permitted. You don't need to go to any -- any creative interpretation here. That's what the statute says.

I also -- I want to briefly address the pickup and delivery service issue, which is -- is raised kind of at the very end of their brief, and I'll cite

6 (Pages 21 to 24)

Page 25

you to it, Your Honor.

On paragraph 27 of their brief, they offer you some -- some cites for the authority that service must be performed within a terminal area or commercial zone for it to be pickup and delivery service as contemplated by the -- the CFR. You can review every single one of their cites as I have and you'll find nothing that says anything like that in those citations. There is no such rule.

And to the degree that there's any confusion about it, Your Honor, I would suggest you -- and I'll provide this cite again to you after the argument, but this is -- take a look at ICC's 1989 decision where it adopted the CFR that's at issue here. Take a look at the way they describe the authority, and they are indeed, as Mr. Fassburg says, talking about door-to-door service. They're not limiting pickup and delivery in any fashion to, you know, the -- the -- the economic area, the commercial zone, the city, what have you. You have been pointed to not a single rule that -- that applies in the fashion that they suggest.

I want to also just briefly address, Your Honor, this -- this business about related to. He says to you that the preemption authority doesn't say anything about related to. It's only if the exemption Page 27

Commission lacks jurisdiction in this instance to require MJ Trucking and Daniel Anderson Trucking to have a solid waste collection permit. And do I understand correctly that your argument that the Commission lacks jurisdiction is based solely on the preemption provision of the ICCTA, the Interstate Commerce Commission Termination Act, that's true?

MS. GOLDMAN: That's -- that's correct, Your Honor, as that authority has been confirmed by the DC Circuit and by the board itself.

JUDGE O'CONNELL: Okay. Is your preemption argument based at all upon the Surface Transportation Board's regulations, the interpretation of its jurisdiction, or the exemption language in 49 CFR 1090.2?

MS. GOLDMAN: Yes, Your Honor, it is because the promulgation of the regulation in that CFR itself and the decision in which the Commission explains the basis for is adopting that -- that -- that regulation and then the DC Circuit's affirmation that the board acted within its authority is the law as -- that goes to the breadth of the authority to regulate rail transportation, which is by statute by itself exclusive to the federal government.

JUDGE O'CONNELL: Okay. Does your motion

Page 26

that says related to. And, Your Honor, that just is not true. The definition of transportation in this --

JUDGE O'CONNELL: Ms. Goldman, you're going to have to stop, but I understand your point, your counterpoint to what Mr. Fassburg said about preemption versus exemption authority.

I want to move forward because I -- I still do have quite a few even more detailed legal questions, if you can believe it, for each side. For -- I want to start with Respondents, and I have many questions that I want to ask, and then I have just as many for Murrey's Disposal.

Ms. Goldman, your -- your motion is a 12(b)(6) motion to dismiss for failure to state a claim upon which the Commission may grant relief. In evaluating your motion, I'm -- I have to construe the facts of the complaint in the light most favorable to Murrey's Disposal, but as I understand, I should -- as I understand your argument, I should rule in your favor if no facts or circumstances consistent with the complaint would present the Commission with jurisdiction; is that correct?

MS. GOLDMAN: That is correct, Your Honor.

JUDGE O'CONNELL: Okay. So I want to
confirm the basis for the motion. You assert that the

Page 28

also include a Commerce Clause argument?MS. GOLDMAN: It does not.

JUDGE O'CONNELL: Okay. And a question about TOFC transportation, would you still argue that states are preempted from regulating TOFC that is not by rail carriers? And I'm thinking, what if the TOFC movement is wholly intrastate, is conducted by a motor carrier only, and never travels by rail?

 $\ensuremath{\mathsf{MS}}.$  GOLDMAN: Your Honor, I think that by definition, that's not TOFC.

JUDGE O'CONNELL: Even if it --MS. GOLDMAN: TOF --JUDGE O'CONNELL: Go ahead.

MS. GOLDMAN: Sorry, Your Honor. TOFC requires inherently, and the DC Circuit explained it, as has the U.S. Supreme Court, the two different types of transport. The -- it can be by both sometimes, but it always includes a rail component.

JUDGE O'CONNELL: Okay. So it's not special to the fact that this is the container, it has to be by rail or by boat?

MS. GOLDMAN: Well, the -- yes -- yes and yes, Your Honor. The relevance of the container is that it is intended for that mode of transportation from door to door. Never to -- never to be unpacked at any point

Page 29

or -- or handled in any fashion. It's put in the type of container that is intended for this intermodal two modes of transportation including rail. So it goes on a truck bed and it goes on the rail car exactly in the same fashion, but it does require that one of those legs be by train.

JUDGE O'CONNELL: Okay. So in reviewing your -- your motion, what is the significance of -- well, there -- they're the same footnote, but there are different footnote numbers. Footnote four in your motion for 200650 and footnote six in Docket 200651, it seems to suggest that the exemption language from the Surface Transportation Board in 49 CFR 1090.2 is irrelevant for the preemption question.

MS. GOLDMAN: Your Honor, let me just read the footnote so I can be sure to answer your question. So I hope this answers your question, and, please, Your Honor, if it doesn't, let me know.

But what we're trying to explain here is that we're not saying that the regulation is what preempts your authority. The statute preempts your authority. The relevance of the regulation is that it confirms the breadth of the regulatory preemption, because absent the authority to act on TOFC matters, in the first instance, as part of its exclusive authority

they point to, which frankly, does not apply based on what they allege. Even if it did, the effect of the exception is to put us back within the federal regulation authority.

Page 31

In other words, it removes it from the exemption. If the exemption says all this stuff that has to do with TOFC, we're not going to regulate it. We the Federal Government, we're not going to regulate it except for the following. And if the following applies, it just means that there's no federal exemption.

None of this has to do with preemption, which is the statute. The statute says that the authority is preempted and -- and it is for the board and the exercise of its exclusive jurisdiction to make these kind of finer points about what types of TOFC they want to regulate still, which is the exception, or which types of TOFC, which is pretty much everything else, they are deeming to be exempt because the marketplace is fully functional and does not require regulation to protect the buying public.

JUDGE O'CONNELL: Okay. I'm still thinking about the fourth sentence in 1090.2. That -- that part of exemption language, it refers back to the exemption stated in the first sentence. And that exemption in the first sentence very clearly says it applies to when the

Page 30

to regulate rail transportation, the board could not have engaged in the rulemaking and then adopted that provision.

So there's discussion about the exemption and then exemption to the exemption, none of that matters for your purposes.

What matters for your purposes is that all of it is TOFC, and then it goes to the far breadth of TOFC, which uncoupled any contractual or control relationship between the rail and the motor carrier and that that is therefore within the bailiwick within the exclusive statutory jurisdiction of the board. Did that answer your question?

JUDGE O'CONNELL: Yes, yes. But I want to follow up and make sure I -- I understand. So you're also saying, for instance, that Murrey's Disposal's argument that transportation offered where the rail carrier's the agent of the motor carrier, it's the fourth sentence of the 1090.2, that argument misses the point because even if that is the structure, the Surface Transportation Board has authority over that arrangement and authority to exempt or not exempt it from federal regulation?

MS. GOLDMAN: Exactly, Your Honor. All of this is part of the jurisdiction and this exception that

Page 32

rail carrier is providing the motor transportation or is jointly providing it with the motor carrier.

So how should I resolve whether that language in the fourth sentence is simply clarifying the exemption in the first sentence and does not imply that the Surface Transportation Board has authority over the circumstances where the rail carrier is only the agent of the motor carrier?

MS. GOLDMAN: So let me start with the last sentence, your last sentence, Your Honor.

JUDGE O'CONNELL: Sure.

MS. GOLDMAN: None of this -- none of this has to do with -- none of -- all of this, no matter which sentence you pick, has to do with confirming the authority, okay? All of this is within their authority to exempt to regulate. That is the determination, the exclusive decision that is to be made by this federal agency, so all of it is within their authority. And, of course, we know that they can revoke to the degree that any of these exemptions they later determine are not effectuating federal rail transportation policy, they can revoke them and reinitiate regulation. So all of this, no matter which sentence you pick, confirms the breadth of the authority of the -- of the board.

I would say too, Your Honor, that this last

that.

Page 33

sentence is -- in general is talking about the entire exemption. It's saying the exemption. It's not just referring to the circumstances in the first sentence.

But if we look at what the second sentence of this -- of this regulation says, it's even more important to show how incredibly broad the -- the ICC intended it to be. And I will also, Your Honor, if in -- quote to you what the ICC said in adopting this regulation, which it is ordered and I am -- am reading, Counsel, from the 1989 decision of the board improvement of TOFC/COFC regulation pickup and delivery. And I will provide to Your Honor again the cite after the argument.

The -- the ICC states it is ordered the over-the-road portion of TOFC/COFC pickup and delivery services provided by motor carriers as part of a continuous intermodal movement is exempted from regulation to the extent -- extent noted above.

So they are saying here that any TOFC service that is provided by a motor carrier as part of this TOFC continuous intermodal service is exempted. That is the intent of their enlarging the exemption in 1989

JUDGE O'CONNELL: Okay. I -- I have for both sides some questions to follow up on the history of the adoption by the ICC and the STB. In my review of 49

MS. GOLDMAN: Yes, Your Honor, and I can't imagine there's any dispute about that because that's exactly what ICCTA said about its reorganization.

Page 35

Page 36

JUDGE O'CONNELL: Okay. Does it -- does it matter that it is solid waste that's the item that is being collected from McKinley and Port Townsend Paper and put into the TOFC because -- well, let me give you the chance to respond.

MS. GOLDMAN: No, it -- it doesn't matter for purposes of the impact of the TOFC. There's one point to be made about solid waste, which is separate from the TOFC, but it is to reference the jurisdictional statute, and I want to give you the cite, Your Honor. It's 49 USC Section 10501.

JUDGE O'CONNELL: 10501?

MS. GOLDMAN: 10501, and it's C, Sub C, Sub 2, Sub B. And what that says, I'm going to read it to you, Your Honor, this is -- this is what follows after the statements in the statute that transportation by rail carrier that the jurisdiction of the board over that will be exclusive.

Later as a result of many of the cases that Murrey's has brought to you regarding what happens at these transloading facilities and the concern about nobody being able to regulate the environmental impact

Page 34

CFR 1090.2, I -- I notice that the regulation is almost wholly the same as the regulation previously written by the ICC. Is it -- Ms. Goldman, is it your position that the ICC, similarly to the STB, has sole jurisdiction over TOFC transportation?

MS. GOLDMAN: Yes, Your Honor. That's an excellent question. The ICCTA, when it was adopted, was a big reorg. They changed the name of the board, but it specifically gave the board the exact same scope of jurisdiction. And each of these statutes that -- that we are -- that I've mentioned in my argument existed at the time. And there -- so for example, they're -- they're referenced in Central States where Judge Ginsburg goes through this regulatory and statutory history. The citations are all wrong now, but all of those statutes exist today in -- in the -- in the formats that I've identified, so it's the same.

JUDGE O'CONNELL: Okay. So would it still have -- would it still have value at all, then, how the ICC interpreted it -- its jurisdiction because all of that was brought in the same? Okay.

MS. GOLDMAN: Yes.

JUDGE O'CONNELL: I'm -- I'm seeing you nodding, but for the -- the court reporter, I want to make sure verbally yes, that's...

because the -- the cases were saying well, this broad preemption means that none of these city and state and local environmental regulations apply, and -- and many of those cases that have been cited to Your Honor say

Well, Congress then went back and it withdrew a small sliver of this broad authority, exclusive authority in -- in the statute that I quoted to you, and it says the board does not have -- except as provided in the unrelated paragraph, the board does not have jurisdiction over solid waste rail transfer facility, et cetera.

So that confirms because it's only limited it very -- in a very small way that otherwise solid waste was interpreted as one of the many commodities that could be part of rail transportation and was subject to the exclusive jurisdiction.

JUDGE O'CONNELL: That -- that's what I want to ask a question about. How should I resolve ICC rulings that state solid waste is not property for purposes of its regulations?

MS. GOLDMAN: Well, Your Honor, I would point to what is -- I would point you to this statute, to this -- this jurisdictional statute, which carves out only the small piece of what at that time was a broad --

9 (Pages 33 to 36)

1.5

Page 37

broad case law saying that the case law, the courts, the -- the appellate courts of the United States saying that the preemption authority included preemption over the transport of solid waste. It was not treated any differently than any other commodity.

1.3

1 2

And then Congress made only the small change to say, well, you know, if you're going to build a facility, which is really going -- getting a little far away from transportation anyway, we want -- you know, we want the Environmental Protection Agency and we want the local environmental agency to be able to regulate it. But other than that, Congress left undisturbed these cases that had said that transportation involving solid waste was subject to this preemption.

JUDGE O'CONNELL: Okay. That -- so I will -- I am -- I still have more curiosity about this distinction between solid waste and whether it is or is not property within the jurisdiction of the ICC and now the STB. I'm still curious whether the distinction that some of ICC's cases, the distinction that it -- it calls, whether that still holds any value in the -- in the jurisdictional evaluation.

But what I've heard from you, I think, I'm going to give you a chance to -- to clarify, is that because of the ICCTA and the reorganization, any -- any

Page 39

MJ Trucking or Daniel Anderson Trucking a rail carrier?

MS. GOLDMAN: Absolutely not.

JUDGE O'CONNELL: And -- and Waste

Management of Washington -
[Simultaneous talking].

JUDGE O'CONNELL: Right. And Waste

Management of Washington and Waste Management Disposal Services of Oregon, they're -- are they a rail carrier?

9 MS. GOLDMAN: They are not. 10 JUDGE O'CONNELL: Okay.

MS. GOLDMAN: The component of the TOFC that confirms that this is TOFC that is by rail is by the rail carrier, by Union Pacific. And that is what TOFC is defined to mean. TOFC is a -- is accommodation. It's not one part. It's both parts, or in this case, multiple parts, but it's from door to door including the intermodal, the two modes of transportation. And in this case, none of the respondents are providing the rail mode.

JUDGE O'CONNELL: Right. So how is the -the transportation provided by MJ Trucking and Daniel
Anderson Trucking from McKinley and from Port Townsend
to the Olympic View Transfer Station, how is that
integrally related to transportation provided by a rail
carrier? Is it just because it's TOFC?

Page 38

distinction that solid waste was not property is -- is no longer of value?

MS. GOLDMAN: Well, I -- I would say that the -- the statute, the statute that speaks for the breadth of the jurisdiction is what governs here. And the -- in -- in -- in interpreting that and interpreting the TOFC mandate of -- of authority, which allows for these exemptions, the ICC has never distinguished anything that travels on -- on this method, and it wouldn't be logical. It wouldn't make sense to -- to distinguish it in that fashion and it hasn't. And so that distinction does not matter for purposes of understanding the breadth of the jurisdiction of -- of Congress. There was no carve-out, in other words, solid waste.

JUDGE O'CONNELL: I think -- I think I'm understanding your argument here, and I think I'm also understanding what I expect your -- your answer to my next couple questions to be. And so I think you could be -- it might just be a repetition of what you've already told me, but I want to make sure.

The transportation of TOFC from McKinley or Port Townsend Paper to the Olympic View Transfer Station, that -- is that transportation provided by a rail carrier? And I guess my questions are, are either

Page 40

MS. GOLDMAN: Yes, it is precisely, and -- and that's exactly what Judge Ginsburg held and that is what the board has held, that TOFC is the entire thing. It's not just putting something on a train. That's something else. TOFC involves these two modes of transportation, and it contemplates that one of the modes is going to be by truck or by boat in certain circumstances, which are not relevant here. And the second is going to be by train. You're going to put stuff in a container, that container is just going to move along like on a conveyer belt between these various modes.

And so it's the combined fact of the TOFC service that makes this such different than anything else you regulate, Your Honor. It makes it -- why the question as posed by Murrey's is not indeed the question we're talking about here where you throw in a train under any circumstances and -- and the UTC's legs are cut out from under it for regulating.

That's not the case. It's because it's part of this combo, this -- this TOFC service as defined both by the board and confirmed by the Supreme Court. The Supreme Court has defined it. You can find the definition of -- of -- of TOFC in the several cases we've cited including ICC versus Texas. And you can

1.3

Page 41

find it again in -- in the decision by the board and in the decision by the DC Circuit that it's soup to nuts.

1.5

JUDGE O'CONNELL: So how would the state requirement that a collector and transporter of solid waste, even if that solid waste is in TOFC, how would the state requirement that that entity hold a permit for solid waste collection be integrally related to transportation provided by a rail carrier?

MS. GOLDMAN: So I think the analysis is I may start somewhere else. If you look at the entire -- you look at the subject matter to determine if it's preempted. If it falls within the exclusive jurisdiction, it doesn't really matter what you're trying to do. You know, we're not talking about a preemption where -- conflict preemption where Congress has not expressly spoken, where you're trying to figure, you know, can we marry those two together, you know, does it really interfere with the federal piece if we do this. That's conflict preemption and that's not what's at issue here.

This is express preemption. This is Congress saying straight up, States, this is not for you. And -- and this makes sense, Your Honor, because railroads have always been federally regulated, and the -- that is distinct here, that the very large Page 43

Page 44

MS. GOLDMAN: Waste Management of Washington is the contracting entity of the -- the other entity owns the landfill in Oregon.

JUDGE O'CONNELL: Right. Okay. And --

MS. GOLDMAN: But, again, Your Honor -JUDGE O'CONNELL: -- so I'm -- I'm curious,
then, who could be the -- consistent with the complaint,
who could be the customer and would receive the bill of
lading for the portion of TOFC provided by Union
Pacific?

MS. GOLDMAN: Waste Management. JUDGE O'CONNELL: Okay.

MS. GOLDMAN: But, again, Your Honor, it doesn't matter. I mean, that's -- that's a matter of contract, right? I mean, it could be set up in any fashion and -- and none of it matters. It doesn't matter how you set up, who gets the bill of lading, because the entire thing is TOFC. The whole thing is TOFC by virtue of the intent to transport from a -- from a truck to a rail car or vice versa and in these containers from the beginning to the end. So that doesn't -- that does not matter. That's not a fact that matters one way or the other. You can assume what they've alleged, you can assume -- you can assume what they've imagined, it still wouldn't -- wouldn't make any

Page 42

infrastructure of federal regulations from, you know, hundred years back has been to control railroads with very minor roles, if any, for states.

So I don't know if that fully answers your question, but I think you start with the statute, which says it doesn't really matter. It doesn't really matter what the state is trying to do, the state cannot do it because it lacks jurisdiction or authority.

JUDGE O'CONNELL: I have some questions about the complaint. Consistent with the complaint, who could be the -- the customer and receive the bill of lading from MJ Trucking and Daniel Anderson Trucking's portion of the TOFC transportation and would it matter who the customer is?

MS. GOLDMAN: No, it would not matter. It's TOFC, so it would not matter, and you can see that the breadth of how the Commission has interpreted TOFC, but here the -- the -- the shipper is Waste Management. Though Waste Management typically shows up before you as a motor carrier, it's not a motor carrier here. The hauler is providing a service that is contracted through Waste Management as is the rail component.

JUDGE O'CONNELL: Is it -- I'm sorry. So Waste Management Disposal Services of Oregon or Waste Management of Washington?

1 difference.

JUDGE O'CONNELL: Okay. I am seeing the trend in your answers to my questions, but I still think I need to make sure that I at least voice my questions and give you a chance to -- to say it.

Does it matter whether McKinley or Port Townsend Paper intends to send this solid waste to Oregon?

MS. GOLDMAN: No.

JUDGE O'CONNELL: Okay. Is it clear from the complaint whether Union Pacific and Waste Management Disposal Services of Oregon or Waste Management of Washington jointly provide the collection of solid waste and transportation services to McKinley and Port Townsend Paper?

MS. GOLDMAN: Well, they don't provide the collection. I don't believe that's alleged. They provide the transportation service. I mean, they're just a train that -- and that's as alleged in -- in the complaint. But, again, it wouldn't matter. It wouldn't matter so long as it's part of this type of trans- -- rail transportation. Rail transportation is something that the State of Washington can't regulate even if there was -- if there was no trucking part of this, if there was no motor carrier part of this and the rail

JUDGE O'CONNELL: Right. I'm -- I'm not sure that that's -- I'm going to give Murrey's Disposal a chance to talk about that, but I don't think that's what is alleged in the complaint. I think it revolves a lot around the transportation, the motor transportation from the -- the source to the Olympic View Transfer Station. So -- but is that -- is the entire transportation of the TOFC, is that offered jointly by Union Pacific and Waste Management?

MS. GOLDMAN: Well, would -- do you mean jointly as in there's a contract whether they do it together? It -- it's -- it's offered jointly in the sense of a through transport. It's intended by everybody that it's going to be coming in on a truck in a container and then it's going to be a through transit to a train and -- and then it's going to go to its destination. That's what -- that's what this is about.

JUDGE O'CONNELL: Does it matter -- sorry. Does it matter that there's two bills of lading? I'm --MS. GOLDMAN: No.

JUDGE O'CONNELL: -- guessing you're going to say no. Okay.

the exercise of jurisdiction by the Commission by the board to exempt from authority this broad type of -- of conduct. It's not any specific one.

I mean, there are various different types of situations that are contemplated by the exemption. So what it is doing is saying this is an appropriate exercise, this authority was delegated by Congress to the board, the DC Circuit is saying you, the board, have exercised your -- your authority well within the jurisdiction, and based on your experience, because between each of these rulemakings, they did a lot of information gathering to see how is this working. Does this matter? Does this permutation matter or does this permutation matter as far as how it impacts the market, which is what they care about, right, for purposes of federal transportation.

And -- and what the DC Circuit is saying here is not to any specific fact matter, but simply to say you have the authority to make this determination based on your exclusive jurisdiction and your -- and that's what -- that's what the -- that's what Judge Ginsburg says when she says -- when she confirms that the exercise -- and, Your Honor, this is on page 1102 of Central States, just above where it says Roman numeral III two paragraphs up, she says, (as read) The exercise

Page 46

MS. GOLDMAN: No, I mean, it -- and you can look again at the regulation and its very permutations and -- and in Central States what Judge Ginsburg says is this is effectively everything. They -- they have contemplated now with this third rulemaking really any scenario that you can piece it together of -- of, you know, who contracts, what the -- what the mechanical arrangement is and what the contractual arrangement is. And any of it is -- is part of this exemption and is part of this authority.

JUDGE O'CONNELL: My -- my last question is about Central States and that decision from DC Circuit. Isn't that case based upon circumstances where all motor carriers are agents of the rail carrier? And why would that case show that there is exclusive federal iurisdiction over circumstances where the rail carrier is the agent of the motor carrier?

MS. GOLDMAN: Well, the -- the rail carrier's not the agent of the motor carrier here. I mean, the motor carrier is -- is DAT or MJ. It's not Waste Management. Nobody's alleging that a Waste Management truck has anything to do with anything here. That's not -- that's not in the complaint and it's not even imaginably within the complaint. But what Central States is doing, Your Honor, is it is affirming the --

Page 48

Page 47

of the ICC's section 10505 exemption authority neither lodges nor dislodges agency jurisdiction. It presupposes ICC jurisdiction over the persons or services as exempted. So it's talking here, she -- she is reviewing a regulation, not a regulation's application with specific fact pattern to the exclusion of others.

Now, I don't know if that longwinded answer actually addressed exactly what you were asking for, so if you would please tell me if I missed it.

JUDGE O'CONNELL: No, I think you did address it, so thank you. And that is all of my questions that I have for Respondents, so thank you, Ms. Goldman.

For Murrey's Disposal --MS. GOLDMAN: Thank you, Your Honor. JUDGE O'CONNELL: You're welcome. Mr. Fassburg, some of my questions for you are the same or very similar to the points that I asked of Respondents. This -- this occasion asked me to resolve a 12(b)(6) motion to dismiss. You -- you note

that there is a presumption against preemption in areas

23 where the States have traditionally exercised their 24 police powers. The collection and transportation of 25

solid waste is one such field, rail transportation is

Page 49

regulation of solid waste because solid waste is not property.

definitely not. How -- how should I resolve that conflict?

Well, what's preempted, what is clearly preempted when it relates to a rail carrier, which these respondents are not, is the transportation of passengers and property. Same word is used. And so even if there is preemption, there's a remaining question of whether or not preemption extends to solid waste.

MR. FASSBURG: I think it's actually a fairly simple proposition to resolve. What you have not seen in any of the case law or citations addressed by the Respondents is any authority for the actual preemption of TOFC service. It's Ms. Goldman's argument that because there is reference in cases reviewing the exemption authority of the ICC, that it has jurisdiction to regulate. She therefore says as a result of the jurisdiction to regulate, therefore the service -- all TOFC service is preempted. That is not addressed in any authority, only the exemption authority. And as I mentioned earlier, the ICC had regulatory authority over trucking in 1989, 1987, and 1991. And what is not clearly addressed here is whether the -- the authority to regulate or not regulate is the same exact authority as broad preemption like as claimed by Respondents.

JUDGE O'CONNELL: Okay. So I want to come back to that. Your argument based on the text of the ICCTA states that federal jurisdiction is only over transportation by a rail carrier, but since the ICCTA states that the Surface Transportation Board will have jurisdiction over all matters related to rail carrier providing transportation, doesn't the Surface Transportation Board have deference on interpreting the extent of its jurisdiction if any amount of transportation by rail exists?

Without connecting those dots through authority, it is a guess, but courts require the clear intent of Congress to preempt particularly in fields whether there's a strong state interest in regulation like we have here. If this were transportation by a rail carrier with STB rail carrier authority, we might be talking about -- well, we might not be talking about

MR. FASSBURG: I believe it does have deference with respect to interpreting its own jurisdiction, but it has not interpreted its own jurisdiction as having broad preemptive effects. Instead it has determined it has the right and authority to be exempt from regulation. And where it has not so acted to exempt, there is not to be presumed preemption

Page 50

Page 52

Page 51

this at all here today.

What we are talking about is transportation by a trucking company and whether or not that transportation by a trucking company is preempted by a statute that is expressly limited to transportation by a rail carrier.

JUDGE O'CONNELL: So if there is this broad preemption by federal jurisdiction over the transportation of TOFC in any form, how could the complaint assert any claim upon which the Commission could grant relief?

MR. FASSBURG: Well, there is another element here that needs to be addressed, but this is -- this is primarily the issue that's being addressed by the movement. They did not address whether property would -- would or would not in fact be preempted, and you raised good questions about that earlier. The fact that they made clear, that Congress made clear it does not intend to preempt the regulation of transloading facilities does not by a converse indicate the clear intention to regulate or to preempt, I mean.

So these -- these cases that you were referencing, the ICC cases, are very much analogous to cases that we've cited in which it is determined under the FAAAA there is not federal preemption of state

of -- or I'm sorry, a presumption of preemption. The authority to regulate is not synonymous with preemptive authority.

JUDGE O'CONNELL: So have there been -- in what has already been submitted to me, are there STB -- sorry, Surface Transportation Board decisions that address whether it has jurisdiction over all of TOFC transportation regardless of whether it's by a rail carrier or by a motor carrier?

MR. FASSBURG: The -- that's a good question. I -- I believe its exemption authority has been interpreted. That's a different statute, by the way, than the jurisdiction, and that's a clear distinction that should be made here, the exemption authority in the -- in the ICCTA, but it's set forth in a different statute. And so its exemption authority has been interpreted to be broad to anything related to a rail carrier.

JUDGE O'CONNELL: So -- okay. But how could Congress delegate the Surface Transportation Board authority to exempt things that are not within its grant of authority to regulate?

MR. FASSBURG: Well, that doesn't -JUDGE O'CONNELL: Does one necessarily imply
the other?

Page 53

MR. FASSBURG: Authority -- again, authority to regulate is not the same as preemption. You can have both state and federal regulation over the same field, and this is not a broad field preemption argument. This is an argument made by the Respondents that 49 USC 10501 broadly preempts all TOFC service. That language does not exist.

And so, again, you can have federal -- as an example that I gave earlier, there was -- there was federal regulation of interstate trucking that did not preempt state regulation of intrastate trucking. Those were contemporaneous. Here we can have federal regulation of railroad and of interstate TOFC/COFC service that falls within its exemptions, but that does not preclude the state's regulation of solid waste transportation to a rail carrier.

JUDGE O'CONNELL: Okay. So it is -- changing the topic just slightly, is TOFC a type of container that is presumed to be related to transportation by rail?

MR. FASSBURG: TOFC service is intermodal service that is transportation of a container that can be interchanged between multiple modes of transportation. You could have intermodal service that does not include rail. So the type of container is not

it is reaching out and contracting to provide service to

Page 55

Page 56

a generator of solid waste. But in order to evade the
 regulatory scheme, it has devised a way to -- to use the

railroads preemption to claim that it is preempted. And

so what it does as we've alleged is first it contracts

with the generator of waste, then it arranges to
 subcontract the haul to a trucking company who then

subcontract the haul to a trucking company who then
 takes it to Waste Management's transloading facility at
 the Olympic View Transfer Station, loads it onto Union
 Pacific's train, and we believe Waste Management is the
 one arranging for and paying for transportation, but is

in fact a motor carrier using this scheme to avoid regulation.

JUDGE O'CONNELL: So if subcontracting makes an entity -- if subcontracting with a motor carrier to provide the transportation makes you a motor carrier yourself, would subcontracting with a rail carrier make you a rail carrier?

MR. FASSBURG: No, there is a difference. Waste Management of Washington is a motor carrier, and if it arranges to transport for freight that it does not own, it is owned by a third party, and then a trucking company it subcontracts to receives the load, that's an assignment of a load. It is still a motor carrier, it still has motor carrier authority. It has simply

Page 54

specific to rail. It is specific to intermodal service. But the definition of TOFC is in fact transportation of a container that can go from truck to rail.

JUDGE O'CONNELL: Okay. Regarding the 49 CFR 1090.2, you -- you argue that consistent with the complaint, the circumstances fall under that fourth sentence, which says that motor carrier service in which a rail carrier participates only as the motor carrier's agent is -- is not under the exemption in 49 CFR 1090.2. Consistent with the complaint, is Waste Management in Washington or Waste Management Disposal Services of Oregon a motor carrier?

MR. FASSBURG: Waste Management of Washington is a motor carrier, and consistent with our complaint, unlike the -- the statements made by counsel for Respondents, which were not consistent with the complaint, we've alleged that Waste Management of Washington is subcontracting the haul to the trucking company. Waste Management of Washington is indeed a motor carrier. It holds motor carrier authority from the Department of Transportation. It holds a certificate of public necessity and convenience from the UTC. It's a solid waste transportation company.

Here, as we've alleged and we believe the discovery will reveal these are in fact the facts here,

assigned a load to a third party.

It does not become a rail carrier, as a matter of fact or as matter of authority, to contract with a rail carrier to replace a leg of its own transportation. In fact, that's — that's what plan one TOFC service is, which has not been exempted and is clearly not being exempted. That's something Ms. Goldman did not address accurately in her description earlier.

She states to Justice Ginsburg an opinion about the extent authority -- or the extents, sorry, of the exemption, but the actual rulemaking in 1989, and I'm sorry, I -- I'm trying to pull that up, I believe we've actually already cited to that. It specifically states that plan one TOFC service was not exempted. And plan one TOFC service is where a motor carrier -- and I -- and I'll -- I'll remind you at the time these rules were made, there was economic regulation of trucking. And so they had to have tariffs that were approved and they had to have posted rates and they had to charge the rates.

So if a trucking company replaced its own line haul with the railroad line haul so that the trucking company did the pickup, they took it to a terminal, then it was taken by container to a rail

14 (Pages 53 to 56)

1.3

Page 57

facility, a railhead, then taken by a rail, but the railroad is not the one posting the tariff, and it's really trucking service where the trucking company subcontracts the rail company. That was not exempt.

JUDGE O'CONNELL: Okay.

MR. FASSBURG: That -- that is exactly what is happening here.

JUDGE O'CONNELL: So as regarding my question, it sounds like Waste Management -- Waste Management of Washington by fact that it does have a certificate to haul solid waste from the Commission that, you know, you are saying that they are a motor carrier because they have that authority.

I'm curious about the situation where if it's an entity that doesn't have already a certificate from the UTC as a motor carrier, if they were to independently arrange or, you know, contract with a motor carrier that transported TOFC to the -- to the transfer station, would they -- would they be considered a motor carrier or would they be more aligned as an independent shipper or receiver?

MR. FASSBURG: Well, I think you didn't provide enough facts to answer your question. I would suggest in a situation like that, they probably should at least have brokerage authority and then it would be a

Page 59

I've reviewed them again both this morning.

I'll tell you Central States and ICC v. Texas both deal exclusively with exemptions from regulation and, again, as I mentioned earlier, ICC v. Texas talks about exemption from state regulation, not from federal regulation. If there was broad preemption as the Respondents claim, there would be no need to exempt from state regulation.

JUDGE O'CONNELL: Okay. And so in my review of 49 CFR 1090.2, the question I asked Ms. Goldman, and in the sense the regulation's almost wholly the same as the regulation previously written by the ICC, does -- does it have any value at all, then, how the ICC interpreted its jurisdiction?

MR. FASSBURG: You raise a good question. It's one that I don't think we can clearly answer today, but what I will tell you is the exemption authority that was utilized by the ICC when these rules were written is not identical to exemption authority of the STB. In fact, it's been recodified. If you read the specific exemption authority address in Central States in ICC v. Texas, that was codified in 49 USC 10505, and the language that's used there is quoted in the case.

The current exemption authority is in 49 USC 10502 and the wording is not identical, and, in fact, in

Page 58

good question as to whether they're serving as a broker or in some other relationship. These are -- and -- and this is one of the reasons why the motion to dismiss should be denied so that discovery can be conducted if the Third Circuit addressed in the High-Tech Transportation case, although contracts typically are used to define the relationships of the parties, they can be used to misdefine essentially the relationships of the parties in order to, in this case, attempt to avoid regulation. All these questions that you're asking are ones that would be answered in this case more clearly through discovery.

JUDGE O'CONNELL: Yes, so that goes to some of the questions I asked of Ms. Goldman, which is, does it -- does it matter about these relationships at this point?

MR. FASSBURG: Well, to the extent they're relying on exemptions at all, the answer is yes, it would matter. And these exemptions they just claimed are the actual only authority under which they could potentially avoid regulation, because there is no authority to support that TOFC has been preempted. Again, the cases expressly relied upon by the Respondents in their motion deal with the exemption authority and do not even use the word preemption.

Page 60

the prior version of that statute, it specifically referenced the authority to exempt regulation in respect to motor carriers in intermodal rate movements. The current exemption statute is, in fact, more limited in it only refers to the rail carrier and intermodal freight movements.

JUDGE O'CONNELL: Okay. I -- I want to ask about the distinction between solid waste and property. How should I consider ICC ruling that states solid waste is not property for purposes of ICC regulation?

MR. FASSBURG: I think that those should be adhered to. With respect to the transportation of freight, again, things that are of value, we probably wouldn't be here today. The reason why solid waste is regulated is because of the public health and safety concerns, and typically in consideration of whether or not the State has the right to regulate, the determination is based upon whether or not the item has value.

This -- both of these two proceedings deal with items that are conceded to be solid waste and do not have positive value, they're not being sold. And so the Commission shouldn't take that fact and consider this to be solid waste, not property consistent with ICC rules.

Page 61

JUDGE O'CONNELL: So Murrey's Disposal and for that matter, not -- neither side, not the Respondents either, made any argument based on whether -- based on the fact that the item being transported is solid waste in this instance. And I'm curious if the reason why neither raised it, is it because that this issue of the distinction between property and solid waste, does it no longer matter whether the solid waste is the item being collected and transported --

MR. FASSBURG: No.

JUDGE O'CONNELL: -- for sake of determining -- okay.

MR. FASSBURG: Go ahead. I'm sorry. I did not mean to speak over you.

JUDGE O'CONNELL: Yeah. Does it -- does it matter for the sake of determining Surface Transportation Board jurisdiction? Obviously, the ICC made those decisions, but is it now something that has changed with the new -- the new act from Congress and new regulations and interpretations by the board?

MR. FASSBURG: That's a good question. I don't know the distinction between solid waste and property has any bearing on things that you would find might have changed in the jurisdiction between the ICC

Page 63

JUDGE O'CONNELL: Okay. How should I resolve the questions as to whether the transportation provided by MJ Trucking and Daniel Anderson Trucking is integrally related to the transportation provided by a rail carrier?

MR. FASSBURG: When it comes to the claim of preemption, and, again, I hope I'm not just repeating myself, but if there's no preemption, it doesn't matter if it's integrally related because -- and preemption is limited to transportation by a rail carrier. I've said that before. It's pretty limited. The regulation authority is broader. So if there is not authority -- or I'm sorry, let me rephrase that. If it is not clearly preempted as courts require, just because there is authority to regulate, does not mean it has been preempted. And that -- so this question of related to, that falls within the exemption authorities here and that is a different question of whether preemption has occurred.

JUDGE O'CONNELL: Okay. I'm noticing the -the difference between the -- the two arguments about
exclusive preemption. I heard from Respondents that the
exclusive preemption is clear and that we -- we don't
get to point where the state is allowed to coregulate.
But you're arguing that the exclusive preemption is

Page 62

and the board. So I think their jurisdiction's the same, the question is whether they are -- whether they're preempting the transportation of solid waste. I would think the rulings from the ICC with respect to property, are going to be the same under the STB's authority.

JUDGE O'CONNELL: Okay. So -- so, again, about the fourth sentence in 49 CFR 1090.2, your argument is that the circumstances here fall within that description of the -- the agency between the rail carrier being the agent of the motor carrier in this instance. If the Surface Transportation Board has authority to state whether or not that agency arrangement is exempt from federal regulation, doesn't that imply that the Surface Transportation Board has authority to revoke that exemption and regulate that particular agency arrangement?

MR. FASSBURG: Again, it does. Authority to regulate, though, does not mean that it is automatically preempted. So when the federal government has authority to regulate, that does not -- the case law is clear. There is not a presumption in paper regulation and field preemption based on extensiveness of regulation, requires some specific findings that have not been made and are not even being argued.

Page 64

limited to when that transportation is by a railcarrier?

MR. FASSBURG: So let me -- let me hopefully rephrase this and be a little bit more clear. This idea of coregulation and whether or not there's preemption I think can be, again, clearly analyzed in the context of the FAAAA. So you have federal preemption of state regulation of transportation of property by motor carriers and yet, because it is not property, the state is clearly allowed under the case law to regulate the transportation of solid waste.

If this is not transportation by a rail carrier, it is not preempted, and therefore, we're talking about motor carrier transportation. Again, under the FAAAA, there would be federal preemption if this were property, but because it is not, it is subject to state regulation.

The dividing line between motor carrier transportation and rail carrier transportation is pretty clearly delineated within 42 -- 49 USC 10501 and it that states that it must be transportation by a rail carrier, which as defined there in the statute, says a -- a company with rail carrier authority and the Third Circuit interpreted same language. Again, there are pretty clear standards as to who is a rail carrier.

Page 65

And so that's -- you know, sorry for lack of clarification in my earlier explanation, but that's the dividing line, are they a rail carrier, are they a motor carrier? The Federal Government has the right to regulate motor carriers or to deregulate the motor carrier with respect to transportation of property.

Here we're still talking about a motor carrier. We're just talking about one transporting solid waste and therefore until it reaches the rail carrier and is then transported by a rail carrier, it is clearly subject to state regulation. The question of whether or not it is continuing to be subject to state regulation when it's being transported by a rail carrier I think still depends on the definition of property. That has been less clearly determined by courts.

JUDGE O'CONNELL: Okay. Well, consistent with the complaint, does it -- what is the significance of the two bills of lading in these circumstances and does it matter who the customer is who is receiving those bills of lading and organizing the transportation?

MR. FASSBURG: It does under the exemption authority. So as opposed to preemption again, under the exemption authority, and I probably articulated this poorly before, but the purposes of these exemptions was to put the railroads on the same footing as the motor

motion and this case, it has been admitted that it is subcontracted to Union Pacific Railroad.

JUDGE O'CONNELL: So is that the -- how I should interpret the use of the word "joint" is whether it's -- who it's contracted to and the contractual relationship?

Page 67

MR. FASSBURG: Well, at the time the exemption was written, companies, both railroad and motor carriers, typically provided service under tariffs. And so there were joint rate tariffs that were provided jointly by railroads and motor carriers, and I believe when it was for private carriage, they could provide a contract for joint rate. And I believe that's the way it's to be interpreted. This is joint rate. Whether it's in a public tariff or a private contract, if it's a joint rate provided by jointly the motor carrier and the railroad.

JUDGE O'CONNELL: Okay. I want to -- my last question, I want to ask you about the Central States' decision. That decision appears that -- it presupposes that if the transportation of property involves a railroad, it's preempted from state regulation. There were also two bills of lading under the circumstances considered in Central States. How -- how should I think about and how should I distinguish

Page 66

carriers in order to provide door-to-door service. The motor carriers didn't need the railroads to do that. It was to provide a competitive benefit to railroads. If a motor carrier uses a railroad to replace part of its line haul, it is not a necessary component of motor carrier transportation service to compete with railroads. It already had line haul service that was, in fact, faster than rail service.

And so they did not provide this exemption benefit in both directions. Rail carriers or rail carriers operating jointly with rail -- with motor carriers obtained this benefit of 49 CFR 1090.2. It did not work in the reverse, and that was clearly articulated within the rulemakings, particularly in the one that was the basis of the Central State holding. In that rulemaking, they made clear that motor carriers that were replacing their line haul the railroad service were not preempted -- I'm sorry, to be clear, they were not exempted.

JUDGE O'CONNELL: Okay. On that, is it clear from the complaint whether Union Pacific and Waste Management jointly provide the collection of solid waste transportation services?

MR. FASSBURG: It is clear they do not and it is admitted in the answer. For purposes of this

Page 68

Central State and those elements in particular from the circumstances presented here?

MR. FASSBURG: Sure. Central State dealt with local pickup and delivery service, which is, again, a completely different exemption statute -- or I'm sorry, exemption rule. So as we articulated in our brief, and, again, this relates back to the similar concepts, when a motor carrier was required to obtain a certificate of public necessity and convenience, it was typically authorized to provide service over a particular route. And that route often included local pickup and delivery service within a terminal area.

There was significant litigation. If this really becomes a big issue in this case, which I don't believe it will be, we can brief this more extensively. But the pickup and delivery service within the terminal area was part of the authority provided.

What the ICC did in its exemptions was say when the freight has reached the terminal area, you do not need to be the rail carrier or operating jointly with the rail carrier to do the pickup and delivery. And, again, that's in the rulemaking that I discussed earlier. That was in part because it is frequently the case under trucking that when -- or it was at least at that time, it may still be the case -- there's just a

1.3

2.3

Page 69

lot of additional arrangements that now occur now that deregulations occurred. But the shipper or receiver might arrange for local pickup and delivery service via a different company, and so once the freight had reached the terminal area, it was not uncommon for a different company to provide that local service.

1.3

And so in Central States what was being addressed was whether or not the ICC had the exemption authority to go ahead and exempt that service where it was no longer even related to the rail carrier. This was service by a third party arranged for by the shipper or receiver within that local commercial zone or terminal area.

JUDGE O'CONNELL: Okay. That's -- that's all the -- the substance I had for my questions of each side

Ms. Goldman, I -- I see that you would like to be recognized. If you can be extremely brief in your comments, I'll let you make any summary or clarify anything that was discussed.

MS. GOLDMAN: Thank you, Your Honor. I appreciate that, and as the moving party here, I want to -- I want to just focus, Your Honor, again on the statute. The exemption statute, which is 49 USC Section 10502, that is not a grant of authority. It is a

Page 71

Page 72

MS. GOLDMAN: Oh, sorry, sorry, I have a dog in the background. I want to -- I guess to conclude, you can -- you should, Your Honor, and you're required to assume all of the facts they've alleged, and we're not disputing that. For purposes of this motion, the facts as they believe them to be are what you should assume them to be. And you can also rearrange those facts and you can make Waste Management the truck that's actually picking up the -- the -- the -- the waste in the container and transporting it. What matters here is the mode of transportation. This -- this regulatory mechanism that allows for intermodal transportation of solid waste. So you should assume as they had alleged.

I also think that -- I want to make clear to Your Honor, and if you go back and you read Central States, you will not find anything that suggested local pickup and deliveries were what they're talking about. You don't find those words in that case.

What you find is this description of soup to nuts, picking it up from the beginning to door to door. That's what -- that's what it's being contemplated to be. So this idea that somehow local pickup and delivery means something else and that the limit of what Central States was considering, you just will not find that word

Page 70

statute which presupposes jurisdiction. That's what it says. It says the first sentence, (as read) In a matter related to a rail carrier providing transportation subject to the jurisdiction of the board under this part. The DC Circuit held this is not a grant of jurisdiction. It was a recognition of jurisdiction.

So the only grant of jurisdiction is the one that says it's exclusive. That's it. There is no other grant of jurisdiction to the board over rail transportation other than the exclusive one that is found in RCW -- or sorry, in 49 USC Section 10501. So this idea that there is preempt jurisdiction and then this other stuff that -- that -- that -- that Commission and the board can do whatever they want in this other area, but it wasn't really subject to the jurisdiction that is preempted is -- is -- it just doesn't make sense. There is no other authority.

So I wanted to -- to make that point, Your Honor. There's one grant of authority here to the board over the regulation of rail transportation. One and only, and it says that it's exclusive. I wanted to --

JUDGE O'CONNELL: I understand that there is a disagreement between the sides as to what is the exclusive jurisdiction granted by the act. Any last thoughts, Ms. Goldman?

or that concept in the case.

So we respectfully request that this be dismissed. There is no jurisdiction here. The sole jurisdiction over the transportation, rail transportation is that authority in the one statute that is provided to the board, and it has exercised its jurisdiction in multiple ways including precisely the one that is at issue here.

JUDGE O'CONNELL: Okay. Thank you. I -- I feel like I kind of sprung the topic on the parties about the distinction between solid waste and property in prior ICC decisions as neither side brought it up or addressed it. And I -- I'm somewhat unsatisfied by the -- the responses that you've necessarily had to give on the spot when I asked you about it.

I think what I -- I think that I need some more brief analysis from the parties regarding that question about whether the fact this is solid waste in the TOFC containers, whether that has an impact on my evaluation for whether there's jurisdiction including in the way, Ms. Goldman, that you've characterized the exclusive jurisdiction of the STB, because I -- I do think that there is some -- some value in what the ICC interpreted as to its jurisdiction.

Now, whether the interpretation has changed

18 (Pages 69 to 72)

Page 73 Page 75 over time since the change from the ICC to the STB, I --1 1 you the brief whenever you want it. 2 JUDGE O'CONNELL: Okay. Well, then, I'm I expect to be addressed and explained. So I'd like to 2 3 ask that the parties provide short, ten-page limit 3 going to set a date, a deadline of October 8th for a briefs regarding whether it matters that it's solid 4 limited ten-page brief on that issue. I expect to get a 4 5 5 waste being transported in TOFC for purposes of transcript within two weeks, and I typically would 6 jurisdiction. 6 intend and would tell the parties to expect an order 7 So -- go ahead, Ms. Goldman. 7 within ten days from when I get the transcript. 8 MS. GOLDMAN: Your Honor, so that we can be 8 But given that I'm going to be receiving 9 9 sure that we actually address the precise question you these briefs a little bit later than I would expect the 10 10 are concerned about, what are the decisions that you're transcript, I am going to tell the parties that you can referring to? 11 expect that my intention is to issue an order on the 11 JUDGE O'CONNELL: Okay. I can give you one 12 motion to -- the 12(b)(6) motion to dismiss within ten 12 side in particular, and another you've -- you've both 13 13 days of receiving the briefs. And I note that there --14 discussed before, which is the -- I believe it's the 14 there isn't any time constraint on issuing an order, but 15 1989 improvement of transportation rulemaking decision. 15 I do want to be forward and forthcoming with what the 16 But then there's another case, the -- the name is Joray, 16 parties should be able to expect. Okay. Is there --17 J-o-r-a-y, and I will give you the -- the cite that I'm 17 MS. GOLDMAN: Thank you. 18 familiar with is 99 MCC 109. 18 JUDGE O'CONNELL: Parties, is there anything 19 And there may be -- there may be other cases 19 else we need to address today? 20 that are pertinent, there may be other decisions that 20 MS. GOLDMAN: Nothing for -- from us. On explain, contradict and -- and that is the issue that I 21 21 behalf of the Respondents, Your Honor, we're grateful 22 am interested in. At least is -- is there -- should I 22 for the time you gave us this afternoon and the 23 be concerned about the fact that this is solid waste, 23 attention to the briefs and the questions. We're --24 24 we're grateful to the time. and if I should be, to what extent. 25 25 JUDGE O'CONNELL: Okay. Thank you, So that -- that is the question that I'd Page 74 Page 76 like very short briefs on. I want to talk about how Ms. Goldman, Mr. Fassburg. Thank you. Both of you, 1 1 2 2 well -- well argued and your representation of your much time the parties would need to provide that short, 3 3 ten-page brief. Now, I -- I'd like to have the briefs clients should be appreciated, so thank you both. So with that, we are adjourned for the day 4 at approximately the same time as I expect to get a 4 5 and we will be off the record. Thank you. 5 transcript, because I want to -- I want the -- I want 6 the ability to go back and use the transcript from 6 (Adjourned at 3:36 p.m.) 7 today's hearing to help formulate my decision. 7 8 8 Typically, we receive our transcripts within two weeks 9 of our hearings. 9 10 So my question to the parties is, would that 10 11 two weeks be sufficient time for you to write a short, 11 12 ten-page brief? 12 13 MS. GOLDMAN: Yes, Your Honor. 13 14 MR. FASSBURG: And I'd like to check my 14 15 calendar quickly before we can say that. Mr. Wiley and 15 16 I both have a brief due next Thursday that it would 16 17 obviously take up quite a bit of our time. That one is 17 18 a 30-page brief that's due to the Commission. It would 18 19 be beneficial if we could have two weeks from that date 19 20 in order to submit our brief. That -- that would be 20 21 October 8th. I'm sorry, yeah. Yeah, that is October 21 22 22 23 JUDGE O'CONNELL: Ms. Goldman, what are your 23 24 thoughts? Would you benefit from that additional week? 24 25 MS. GOLDMAN: Your Honor, we will provide 25
