Subject: Docket #UE-120767 (and UG-120768)

The WUTC is responsible for serving the broad public interest, NOT cater to the narrow selfish interest of a foreign-owned utility.

The broad public interest includes PROTECTING OUR CLIMATE from the horrible destruction that burning coal is causing.

The broad public interest requires LONG-TERM considerations for converting from a fossil fuel energy system to a renewable energy system.

Decades ago - in the late 1970s - the WUTC recognized that SERVING THE PUBLIC IN AN ECONOMICALLY REASONABLE WAY would PREFER CONSERVATION rather than nuclear power. Now we face a similar situation. CONSERVATION AND RENEWABLES ARE MORE ECONOMICALLY EFFICIENT THAN COAL.

I implore you to REJECT Puget Sound Energy's request to continue generating electricity by burning coal, and to REQUIRE CONSERVATION AND RENEWABLES instead of coal.

I'm Glen Anderson, 5015 15th Ave SE, Lacey WA 98503-2723

I'm at (360) 491-9093 glen@olywa.net
