Subject: Docket UE - 200980 (PSE)

[EXTERNAL]

April 20
Washington Utility and Transportation Commission (WUTC),
Office of Attorney General,
PSE.
DOCKET: UE - 200980

WE OPPOSE any rate hike by or for Puget Sound Energy (a 'risk-assessment' operation owned by a for-profit company, "Energy Holding Company" Puget Energy (think 'Texas Freeze 2021' or Boeing stock crash after planes crashes.):

1. **until WUTC, irregardless of federal regulation, guarantees impossibility of 'Texas-like grid meltdown' without undue burden to individual PSE ratepayers*.**
2. Puget Sound Energy including partners, arrangements, etc, publishes through/with WUTC, total compensation of any/all packages: termination/retirement/stock options, etc paid to, or on behalf of, all members of Board(s) of Directors.*
3. Puget Sound Energy including partners, arrangements, etc, publishes through/with WUTC rate offsets provided to energy partners. (I.e. non-public arrangements/benefits received by business customers.*
4. PSE operations in taking money from communities, without regard or provision for Health of individual ratepayers is similar to a parasite.
5. NO MORE 'rate-hikes' or any other benefits from PSE ratepayer communities. Their Lip-service, feel-good 'community service' is not sufficient.

* i. e. Cost for ALL PSE, and/or partners, users regardless of amount used should be proportional to use, and ALL cost information should be available in laymen's language for any and all customers of PSE and/or partners.

If any information is incorrect, please disabuse. Thank you for your actions regarding this letter.

Sincerely,
Thomas and Donna Gillespie
