Subject: Proposed rate increase PSE , Docket UE-200980

[EXTERNAL]

We again are requesting the UTC decline the significant rate increase PSE is currently presented to you. Last yr they requested a 7 +% increase which wasn't awarded. The rate instead was raised 4% I believe which has resulted in a \$50. increase in my bill for EACH month. I protested then and I do again for this application. Does the UTC ever insist PSE manage their expenditures better and come under budget yearly rather than seeking this sizable increase. We don't have the increasing income to pay for the proposed rates they request continually. A 1 - 2% increase is within a yrly average expectation but not the 4% range we are seeing in this proposal and the larger on in 2020.

Please decline this request and decide on a budget for PSE w/minimal increases for their customers.

Thank you.
