Subject: Docket UE-200980

[EXTERNAL]

Please ask PSE to become more transparent with the data they are using that simultaneously supports raising rates on electricity due to decreased demand while proposing an expensive Energize Eastside project (which we the users will have to pay for) that is intended to support growing demand. In addition, please ask them to explain how and why they believe the various new and green technologies for reducing consumption fit with a “secret” forecast for increasing demand.

Sincerely,

R. Scott and Lois A. Howell
