Dear UTC,

It is past time to put the planet over profit. Are you paying attention to the destruction global warming is wreaking all across our planet? The most vulnerable suffer the most.

I am a PSE customer and I am very concerned about PSE's 2023 Gas Integrated Resource Plan and its "Preferred Portfolio," which offers only meager progress in reducing greenhouse gas emissions, using unproven technology that isn't available yet. Meanwhile, the company would charge customers \$10 billion to pay the Climate Commitment Act penalties for its enormous emissions. In its plan, PSE rejected viable alternatives that would achieve real emissions reductions, stabilize energy costs, and avoid unproven technologies.

I strongly agree with the Washington Clean Energy Coalition's letter, dated May 8, 2023.

Please reject PSE's Gas Integrated Resource Plan. Thank you.

Martha Bishop, Port Orchard
