Dear Chairman Danner, Washington Utilities and Transportation Commission: As a customer of PSE, I believe that it's important to include the estimated social and economic cost of carbon in any final Integrated Resource Plan submitted to your commission. We are currently generating more solar power into the grid than we use. We need to use the energy of the future rather than the past. I ask that all final recommendations in the IRPs coming before the UTC include a broad examination of carbon pollution, new federal air quality standards, and other environmental costs associated with the continued operation of the Colstrip facility. Thank you,

Jim Hansen
