

# N. Ontario Electricity Cost versus Consumer Price Index (CPI)

## Across Canada

This equates to your Avista \$100/mo electric today rising to \$445/mo -- not including natural gas

Avista's rate today=8.1¢/kwhr

\* Ontario's "Fair Hydro Plan" borrows \$18.4 billion to lower customer's electric bills but at a cost of \$30 billion due in 10 years.

The plan "gambles" that interest rates will rise only 1%.
