### Comments:

I am a PSE customer. I believe PSE's 20-year plan, which includes upgrading the coal fired electric plant at Colstrip, MT, represents the most economical means of providing the power that we, the customers and citizens of Washington need. Although CO2 has been greatly demonized as a greenhouse gas, that propaganda is all lies propagated by globalist elitists who want to use that ruse to establish a world government which will be detrimental to all Americans. CO2 is a very friendly gas that is a plant fertilizer and greatly beneficial to the environment. PSE's plan will alleviate all of the environmental concerns associated with coal ash disposal. Thanks for considering my comment.
