

NEW SECTION

WAC 480-100-670 Use of renewable energy credits other than unbundled RECs to comply with the greenhouse gas neutral standard. (1) A utility may use a REC other than an unbundled REC to comply with the requirements of RCW 19.405.040 (1)(a) or to demonstrate performance compared to an interim target established under RCW 19.405.060(1) only if the utility complies with the requirements of this section.

(2) The utility must acquire the REC and the electricity associated with the REC in a single transaction through ownership or control of the generating facility or through a contract for purchase or exchange.

(3) The electricity associated with the REC must be consistent with WAC 480-100-650 (1)(d).

(4) The electricity associated with the REC must be from a generating facility or contract that is part of a resource portfolio reasonably expected to be capable of serving at least 80 percent of the utility's retail electric load over each compliance period. Each utility required under RCW 19.280.040(1) and WAC 480-100-620 to prepare an integrated resource plan must demonstrate compliance with this requirement by, at a minimum, showing through an hourly analysis that the expected renewable or nonemitting output of the resource portfolio could be generated and delivered to serve at least 80 percent of expected retail electric load. This demonstration must use inputs and assumptions consistent with the utility's integrated resource plan and may be updated with changes in its resource portfolio.

(5) A REC is not eligible under this section if the utility sells or otherwise transfers ownership of the electricity associated with the REC in a transaction that (a) contractually specifies the source of the electricity by fuel source or as renewable or (b) transfers the nonpower attributes of the electricity.

NEW SECTION

WAC 480-100-675 Use of renewable energy credits to comply with the 100 percent renewable or nonemitting standard. (1) Except as provided in subsection (2) of this section, a utility may not use a REC to comply with the requirements of RCW 19.405.050(1) unless:

(a) The utility acquired the REC and the electricity associated with the REC in a single transaction through ownership or control of the generating facility or through a contract for purchase or exchange; and

(b) The utility did not use the associated electricity for any purpose other than supplying electricity to its Washington retail electric customers.

(2) A utility may use any REC to comply with the requirements of RCW 19.405.050(1) if:

(a) The utility acquired the REC through participation in a clean electricity market;

(b) The REC is associated with electricity acquired through participation in a clean electricity market; or

(c) The utility obtained all electricity supplied to its retail customers from clean electricity markets.

(3) For purposes of this section, "clean electricity market" means an organized wholesale electricity market that provides for the physical delivery of renewable and nonemitting electricity.
