

WA 360
SUPPLEMENTAL IMPLEMENTATION MEETING MINUTES
Thursday, March 8, 2007

WELCOME AND INTRODUCTIONS

Cecilia Louie opened the meeting and announced the names of the participants on the conference bridge. Ms. Louie explained that this is the Supplemental Implementation Meeting for the Washington 360 NPA based on the granting of delegated authority to implement thousands-block number pooling by the FCC on November 9, 2006 (CC Docket 99-200), and The Washington State Utilities and Transportation Commission (WUTC) order issued in Docket UT-060012, Order 01, *Order Implementing Mandatory Thousands Block Number Pooling in the 360 Number Plan Area*.

The purpose of this meeting was to review milestone definitions and to review the rate centers listed as Attachment A (see attached listing), as well as establish the milestone dates for the 360 NPA.

AGENDA REVIEW

Ms. Louie stated that the following items would be covered during the meeting:

- NeuStar Pooling Overview
- Review of WA 360 NPA Rate Centers currently marked optional (see attached listing)
- Explanation of milestone dates
- Overview of Pooling website
- Questions

SUPPORT DOCUMENTS

Copies of the presentation and other meeting materials were made available prior to the meeting on the NeuStar web site (www.nationalpooling.com). Once on the website, select the REPORTS menu item and choose "NPA/Rate Center Report" then select Washington and the 360 NPA from the two drop down menus. Once the reports page is brought up for the 360 NPA, click on the word "here" listed in the middle of the screen for the Supplemental Implementation Meeting materials.

The following meeting documents were made available:

- A Power-Point presentation handout
- A list of the rate centers currently listed as optional in the 360 NPA

POOLING OVERVIEW

Ms. Louie informed participants that the FCC released CC Docket 99-200, on November 9, 2006, granting of delegated authority to implement additional mandatory thousands-block number pooling in the 360 NPA in Washington. As a result of this delegated authority, the Washington State Utilities and Transportation Commission issued an order in Docket UT-060012, Order 01,

Order Implementing Mandatory Thousands Block Number Pooling in the 360 Number Plan Area on January 24, 2007.

In addition, on February 16, 2007, WUTC Staff requested that Pooling Administration change all excluded rate areas in all NPAs in Washington to optional. This was completed on February 21, 2007.

RATE CENTER REVIEW

Ms. Louie reviewed the rate center file for the 360 NPA. The affected rate centers, as well as the current and new rate center designations, were reviewed. Ms. Louie informed the participants that the rate center file would be updated on the Pool start date and that if a second service provider comes into a single service provider rate center, the rate center designation will be changed from "M*" to "M" as soon as the block is assigned to the second service provider.

REVIEW OF TIMELINE MILESTONES

A review of the milestone definitions was given and the definitions as well as the timeline were included in the PowerPoint presentation.

As no service provider on the call proposed timeline dates, Ms. Louie developed proposed dates using the pool start "by" date of July 31, 2007 as the basis. The WUTC staff requested that pooling begin sooner than the July 31 date because the NRUF reporting deadline is June 30 and they would like the August 1 NRUF submission to be completed by thousands-block. After discussion, it was determined by participants on the call to start pooling on June 29, 2007.

The following milestone dates were agreed upon:

#	MILESTONES	DATES
1	Regulatory Mandate (State Order)	1/24/07
1	Supplemental Implementation Meeting	3/8/07
2	Forecast Report Date	5/18/07
3	Block Protection Date	5/18/07
4	Block Donation Identification Date to Pooling Administrator	5/18/07
5	PA Assessment of Industry Inventory Surplus / Deficiency	6/1/07
6	Block Donation Date	6/22/07
7	Pooling Start / Allocation Date	6/29/07
8	Implementation Date	6/29/07

Ms. Louie clarified that a service provider can always begin pooling prior to the established timeline dates and all affected rate centers are currently listed as optional so forecasts and donations can be submitted at any time.

The WUTC requested that Pooling Administration send a copy of the minutes to those service providers that hold blocks in the 19 affected rate centers and also

advised that they would issue an order to reflect the change in the pool start “by” date.

THOUSAND-BLOCK NUMBER (NXX-X) POOLING ADMINISTRATION GUIDELINES

Ms. Louie reviewed the various pooling forms found in the Thousands-Block Number (NXX-X) Pooling Administration Guidelines. Participants were informed that the forms are also found in the Pooling Administration System (PAS). A user ID and password are needed to access PAS.

NEUSTAR NUMBER POOL WEBSITE

Ms. Louie briefly reviewed the steps needed taken by a service provider to obtain a user ID and password. She also explained the Pooling Administration System forecast and donation process. She pointed out that a “New Service Provider Checklist” can be found under the “Tools” menu item to assist new pooling entrants in identifying necessary steps to begin number pooling. The Pooling Support Desk can be reached by phone at 866-638-7665 or by email at poolingsupport@neustar.biz to assist in answering any questions a service provider may have.

POOLING CONTACTS

A review of pooling contacts was given. Participants were informed that Kevin Gatchell of NeuStar was the pooling Administrator for Washington. It was noted that if Kevin was unavailable to answer questions, a service provider could also contact the pooling support desk. NeuStar Pooling has an escalation process to resolve any matters in an expedited manner.

DISCUSSIONS

- Q)** A question was asked to the Washington Commission staff regarding whether an addendum to Washington State Utilities and Transportation Commission issued Docket UT-060012, Order 01, *Order Implementing Mandatory Thousands Block Number Pooling in the 360 Number Plan Area* would be issued to state that a pooling implementation date earlier than listed in the order had been established for mandatory pooling in the 19 affected rate centers in the 360 NPA.
- A)** The Washington Commission Staff agreed to issue an addendum to the order.

MINUTES OF THE MEETING

The minutes from this meeting will be posted within 2 weeks of the meeting date on the NeuStar web site (www.nationalpooling.com). The minutes can be

accessed by going to the 'Reports' section, selecting NPA / Rate Center reports then selecting the state and NPA, and then clicking on 'Meetings and Minutes.' Then select the minutes for the 'Supplemental Implementation Meeting 03/08/07.'

ADJOURNMENT

The meeting was adjourned at 10:37, Pacific Time.
