Ontario Premier Kathleen Wynne responds to a question about the acquisition of a company that owns coal plants during a tour of BlackBerry QNX Autonomous Vehicle Innovation Centre in Kanata Friday (July 21, 2017).

Acquiring Avista:

- Acquire a company with a small share in a coal electric plant (Colstrip)
- A validation of an opportunity to extend values
- Has large renewable portfolio
- Opportunity to obtain a pollution free electricity grid
- **Opportunity for Ontario to spread that value system**
- We are leading the way in technology of reducing GHG emissions and with a clean electric grid.
- **This is an opportunity for Ontario to share that value system in another jurisdiction**
- Cleaning up the air
- Spreading those value systems
