Washington Utilities & Transportation Commission - April 26, 2006

My name is Marilyn Hills and I am the bookkeeper here representing Gold Beach Water Company on rate case docket number UW-060352.

The Gold Beach Community on Vashon Island was developed in the 1960's by Dom Spano who drilled it's first well in 1965. Dom Spano ran the water company until his death 10 years ago, at which time his son, Michael Spano a Civil Engineer in Edmonds, took over it's management.

Page 1. GBW - Rate increase customer notice, March 1, 2006

We are asking to increase our basic water rate by \$3.84 a month or \$8,478.72 @ year. We have been regulated by WUTC since 1987 under the very same rate design:

0 - 800 cubic feet of water included in the base rate

800 - 3,000 cubic feet of water use in the midlevel rate (per 100 cf)

Over 3,000 cubic feet of water use in the highest level (per 100 cf)

In 6/1987 = \$16.00 / .20 / .35

In 11/1992 = \$20.95 / .25 / .45

In 7/1998 = \$26.16 / .32 / .58 \*current rate

When our rate increase letter went out to our current 184 customers, we did not get one call at the office questioning our need to generate more revenue to fund increased Operational Costs and Capital Improvement Expenses. Everyone is well aware that the costs of everything continues to go up and the water company is no exception. That shows 100% "Approval" from those people we serve at Gold Beach. Our annual Consumer Confidence Report keep customers updated on the progress of current projects - customers see the continual improvements being made (a new treatment plant in 2001 and a new tank at midlevel in 2005) and give us their support.

Page 2. WUTC - GOLD BEACH WATER - SUMMARY FOR 8 YEARS
Loss in the last 3 out of 4 years. Increases to Plant from improvements.
Steady 2-5 Hookups each year. DECREASE in Water Usage 2005 - <u>By Conservation</u>.
(\* \*Note: GBW Customers are already doing a good job Conserving Water!)

#### Page 3. GOLD BEACH WATER - Profit & Loss 2005

In Income - Owner loaned GBW \$5,000 to help complete midlevel tank project in 2005. In Expenses - New tank costs = \$25,000 were moved to Plant & are being Depreciated.

Page 4. GBW CAPITAL IMPROVEMENTS SUMMARY - Water System Plan-Page 27

#1 Treatment Plant - Completed "2001" Actual Cost=\$45,000 Projected Cost=\$8,000

#4 Auxiliary Tank - Completed "2005" Actual Cost=\$25,000 Projected Cost=\$4,000

#5 Source Meter - Completed "1998"

#6 Computers - \$500 PC in "1999" & \$1,000 PC in "2004"

Costs on #1 & #4 equal 6 times more than projected and took more time to complete.

#2 Upper Tank - Scheduled to start 2006/2007 (Have DWSRF Loan = \$60,000 waiting)

All Capital Improvements have been financed thru Basic Rate and owner contributions. GBW has No Surcharge Charge; No Reserve Account; or Capital Improvement Fund. Gold Beach Water has no outstanding loan and have not had any loans in 15 years.

#### FACTS FROM 2005 YEARLY REVENUE:

|               | Basic Rate:  | Mid Rate: | High Rate: | Total Revenue: |
|---------------|--------------|-----------|------------|----------------|
| 1/2-3/1/05 =  | \$ 9,417.60  | \$ 51.71  | \$ 00.00   | \$ 9,469.31    |
| 3/1-5/1/05 =  | 9,469.92     | 84.01     | 82.43      | 9,636.36       |
| 5/1-7/1/05 =  | 9,469.92     | 373.65    | 27.63      | 9,871.20       |
| 7/1-9/1/05 =  | 9,469.92     | 1,043.67  | 621.58     | 11,135.17      |
| 9/1-11/1/05=  | 9,626.88     | 393.25    | 6.73       | 10,026.86      |
| 11/1-1/1/06=  | 9,626.88     | 89.62     | 45.09      | 9,761.59       |
| 2005 Totals=5 | \$ 57,081.12 | 2,035.91  | 783.46     | \$ 59,900.49*  |

<sup>\*</sup>These are field numbers, so are not as accurate as actual dollars received. GBW above numbers show that Basic Rate = 96% and High Use = 4%!

As the above numbers show, the biggest share of our revenue comes from our basic rate design. I feel it would be jeopardizing the financial stability of the water company not to charge a Basic Rate for 0 to 500 cubic feet of water each month. GBW needs a steady, reliable dollar amount that it can count on every month that's not attached to water usage.

In Washington State all it's residents own all of our water. What a water company sells is our services and the costs to bring water to a customer's home. A Basic Rate is fair to all customers because they all benefit from improvements and should share the costs even if less than 500 cf is used each month. I do not feel some subsidizing others is a problem.

Page 5 & 6. Comparison of Revenue under 3 Alternatives: From Actual 2005 Usage 184 x 6 = 1104 Events. Revenue from Base Rate: Marilyn's = 91.2% Jim's = 84.2% Existing Rate = 95.4%

Staff agrees that an increase of \$8,479 is justified after their review of the GBW books. After 3 months time, staff is recommending to suspend our tariff filing. Staff believes a zero allowance rate design is fair to both the company and the customer. It is not fair and reasonable to GBW if you look at the actual 2005 usage in the attached chart.

Page 7. Staff's 2005 Crossover Chart based on an <u>average of 913</u> cubic feet of water. This method would generate approximately the same rate of \$30. per customer providing all customers used 500 cubic feet of water each month and produces a \$4,000 shortfall.

GBW bills every 2 months = 1/1-3/1-5/1-7/1-9/1-11/1. With a May 1, 2006 effective date, GBW customers would receive their first revised bill on 7/1/06. If our tariff filing is rejected, we would be forced to wait another 2 months and the new rate would show up on the 9/1/06 billing with the higher summer water usage included. I am asking that you approve the GBW tariff filing as submitted using a Basic Rate Design=\$30 for 0-500 cf.

Gold Beach Water Company, Inc. P.O. Box 2138 Vashon, WA 98070 206 463-9958 March 1, 2006

#### IMPORTANT NOTICE

GOLD BEACH WATER COMPANY, INC. has asked the Washington Utilities and Transportation Commission for permission to increase it's basic water rates by 3.84 a month/ or \$46.08 per year @ 184 customers = \$8,478.72 per year increase. Proposal filed under WUTC docket number UW-060352. If approved, the new rates will become effective May 1, 2006 - with the first revised billing due on July 1, 2006. This rate change will help cover increased OPERATIONAL COSTS and CAPITAL IMPROVEMENT EXPENSES and will encourage WATER CONSERVATION. Our last rate revision was 8 years ago - July, 1998.

Below is a comparison of the current and proposed rates. All rates are monthly rates with billings every two (2) months.

| RATE SCHEDULE - METERED SERVICE   | CURRENT RATE | PROPOSED RATE                           |
|-----------------------------------|--------------|---|
| All usage up to 800 Cubic Feet    | \$ 26.16     | * |
| All usage up to 500 Cubic Feet    |              | \$ 30.00                                |
| (Base rate per month)             |              |   |
| Usage over 800 up to 3,000 Cu.Ft. | .32          | <b>50</b>                               |
| Usage over 500 up to 2,500 Cu.Ft. |              | .50                                     |
| (Per 100 Cubic Feet)              |              |   |
| Usage over 3,000 Cubic Feet       | .58          | 1.00                                    |
| Usage over 2,500 Cubic Feet       |              | 1.00                                    |
| (Per 100 Cubic Feet)              |              |   |

"The commission has the authority to set final rates that may be different from those requested, based on the results of their investigation." If you have questions about this filing, please call the Company at 463-9958. If you wish to comment on this request or have question about the rate making process, you my contact the Commission at the following address:

### WASHINGTON UTILITIES & TRANSPORTATION COMMISSION P.O. Box 47250, Olympia, WA 98504-7250 1-800-562-6150 (Toll Free)

Gold Beach Water Company Small Water System Plan; page 27 of 41

### 6.1.5 Improvement #5

Under an operating agreement dating back to the inception of the Gold Beach Community development, the Gold Beach Community Club has never been billed for water used at its facility. To adequately monitor use and loss within the system, Gold Beach Water Company has installed a meter to measure the amount of water used by the Community for its clubhouse and pool.

### 6.1.6 Improvement #6

Office support equipment is badly antiquated. To maintain the level of professionalism expected of modern utilities today, new equipment will be purchased. Equipment either being replaced or obtained for the first time includes but is not limited to: computer; printer; copy machine; FAX machine.

# 6.2 Costs and Schedule of Improvements

Costs and schedule of satisfaction can be found in the Capital Improvement summary table below:

Table 6.2 Capital Improvement Summary

| Problem                                    | Solution  | Start Date                | End Date                  | Cost () 110001"      |
